Internship & Summer Job Fair  
February 18-19, 2015, 11am-3pm  
Recreational Sports Facility (RSF)

Hosted by the Career Center, ESW Engineers for a Sustainable World, HKN Eta Kappa Nu, HBSA Haas Business School Association, ISAB International Students Association at Berkeley

Employers representing the private, nonprofit and public sectors recruit Cal students for summer jobs or internships - paid and volunteer, year-round and/or summer, on and off campus

Abbott Laboratories

Description of organization:
Abbott is a global, broad-based health care company devoted to discovering new medicines, new technologies and new ways to manage health. Our products span the continuum of care, from nutritional products and laboratory diagnostics through medical devices and pharmaceutical therapies. Our comprehensive line of products encircles life itself—addressing important health needs from infancy to the golden years.

Job/Internship:
The purpose of the internship is to provide meaningful professional hands-on experience to students with proven academic performance and leadership potential. Abbott hires students majoring in Engineering and Life Sciences fields into this internship program based on business need. Ideal candidates will combine technical and business knowledge with analytical strength and creative problem solving abilities.

Type: Engineering  
Degree(s): Bachelor, Masters  
Major(s): Integrative Biology, Mechanical Engineering, Environmental Engineering Science, Bioengineering  
Position(s): Internship  
Work Location(s): United States
Acumen, LLC

Description of organization:
Acumen, LLC / The SPHERE Institute conduct public policy research and statistical analysis on health programs at the national, state, and local levels. We leverage our unparalleled data access to improve information available to policymakers, while our meritocratic environment offers rapid advancement and leadership opportunities. Our policy firms offer an exciting opportunity to work in health care topics.

Data Security Administrator: Job ID: 882202
Technical Information Coordinator: Job ID: 881364
Technical Writer: Job ID: 881369

Type: Other
Degree(s): Bachelor, Masters
Position(s): Paid, Full-time, Internship
Work Location(s): Burlingame, CA / Washington, D.C.

Alpine Data Labs

Description of organization:
Alpine Data Labs makes data science on Big Data accessible to everyone. We have simplified popular machine-learning methods and made them available on petabyte-scale datasets. Our lightweight web application does this by leveraging the parallel processing power of Hadoop and MPP databases. We deliver on the promise of Hadoop and Big Data by providing a collaborative and intuitive visual environment for teams to quickly create and deploy analytics workflows and predictive models.

Job/Internship:
Internship in Big Data Analytics at a Fast-Growing Startup
Develop deep skills in big data and machine learning at Alpine Data Labs, “one of the hottest machine-learning startups”, according to Business Insider, Datamation, and the Wall Street Journal. Alpine has raised almost $30M in funding to build "the next big data startup" (Forbes) and we have tripled our customer base in the last year alone. We are looking for interns to work alongside our engineers and data scientists.
Candidates should be working towards a technical degree, and have a desire to develop expertise in either distributed systems (e.g. Spark, Hadoop, MPP databases) or in statistical and numerical programming. The ideal candidate will already be familiar with the development of complex algorithms.

Type: Computer Software
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): All Majors
Position(s): Paid, Full-time, Summer Job, Internship
Work Location(s): United States
Altria Group
Distribution Company
Field Sales

http://CantBeatTheExperience.com

Description of organization:
Altria Group is a FORTUNE 200 company that owns the premier tobacco companies in the United States including Philip Morris USA, U.S. Smokeless Tobacco Company, John Middleton and Nu Mark. The companies’ premium tobacco brands include Marlboro, Copenhagen, Skoal and Black & Mild. Altria also owns Ste. Michelle Wine Estates, one of the country’s top premium wine producers and Philip Morris Capital Corporation, an investment company. Altria’s mission is to own and develop financially disciplined businesses that are leaders in responsibly providing adult tobacco and wine consumers with superior branded products.

Job/Internship:
Are you ready for an experience that can’t be beat? Currently, Altria is looking for leaders on campus who are seeking either a summer internship or a full time position where they can apply their skills to sell and consult our trade partners. We currently have opportunities for a project-based 10 week paid summer internship, including possible housing allowances, with a focus on sales and analytics. Additionally, we are seeking students interested in a full-time position as a Territory Sales Manager, leading a business consisting of ~$15MM in annual sales.

Type: Consumer Products
Degree(s): Bachelor
Major(s): All Majors
Position(s): Full-time, Summer Job, Internship
Work Location(s): Northern California

Amazon

http://www.amazon.com

Description of organization:
When Amazon.com launched in 1995, it was with the mission “to be Earth’s most customer-centric company, where customers can find and discover anything they might want to buy online, and endeavors to offer its customers the lowest possible prices.”
This goal continues today, but Amazon’s customers are worldwide now, and have grown to include millions of Consumers, Sellers, Content Creators, and Developers & Enterprises. Each of these groups has different needs, and we always work to meet those needs, innovating new solutions to make things easier, faster, better, and more cost-effective.

Job/Internship:
(ID 281576)
We hire software development engineer interns into our technical teams based in Seattle, Washington. Our interns and co-ops write real software and partner with a select group of experienced software development engineers, who both help and challenge them as they work on projects that matter to our customers.
Impact: As a member of the Amazon development team, you’ll be given the opportunity to have direct impact on the evolution of the Amazon e-commerce platform and lead mission critical projects early in your career. Your design, code and raw smarts will contribute to solving some of the most complex technical challenges in the areas of distributed systems, data mining, optimization, scalability, security and tweaking algorithms, just to name a few.

Type: Computer Software, Engineering
Degree(s): Bachelor, Masters, Doctoral
Major(s): Computer Science
Position(s): Paid, Part-time, Student Employment, Full-time, Summer Job, Internship
Work Location(s): Various Locations
Analysis Group, Inc.

Description of organization:
Analysis Group, Inc. provides economic, financial, and business strategy consulting to law firms, corporations, and government agencies. We have experience in a broad range of practice areas across a variety of industries, including finance and securities, intellectual property, antitrust, health care, growth strategy and innovation, insurance, energy, telecommunications, environment, and commercial damages.

Job/Internship:
Summer Analyst Position:
This is a position for 2nd and 3rd (preferred) year undergraduate students with research experience working toward a degree in economics, finance, statistics or a related subject. Candidates should have strong quantitative, analytical, and organizational skills in addition to a desire to work in a pragmatic, research-oriented environment. They should have excellent attention to detail and accuracy, strong communication skills, and the ability to work independently and as part of a team.

Position(s): Full-time, Internship
Work Location(s): Santa Clara, CA

Apttus

http://www.apttus.com/

Description of organization:
Apttus is derived from Latin: the root “apt” means suitable, capable and ending a Latin word in “us” denotes speed. Apttus was formed to deliver the promise of enterprise class application capability, but very rapidly and with high value. Apttus has combined business domain expertise with the Salesforce 1 and provides modules with rich functionality. Apttus’ goal is to provide organizations with an alternative and significantly better way to automate business functions in a way that maps more closely to the needs of organizations.

Apttus was named one of the “Top 21 Enterprise Start Ups to bet your career on” by Business Insider, we are pre-IPO and are growing at an incredibly rapid rate!

Job/Internship:
Engineer: Design and implement features of Apttus’ product suite and develop innovative solutions through the application of VisualForce/APEX.
Product Mgr: Collaborate with multiple teams in multiple departments in order to find a solution and ultimately create a product that satisfies customer business needs.
Prof Services: Involved from the concept stage of analyzing existing processes, the design phase, and finally the delivering and integrating of the end to end complex quoting solutions.
Tech Support: Handle cases that come in through our web portal. Your job will be to troubleshoot customer issues via phone, chat and/or email.
Sales: Become an expert on the value of a Quote to Cash Enterprise SaaS offering, and will be responsible for generating leads for Sales Team.

Type: Computer Software
Degree(s): Bachelor, Masters
Major(s): All Majors, Information Management & Systems, Computer Science Minor, Computer Science, Business Administration, Mechanical Engineering, Electrical Engineering and Computer Science
Position(s): Full-time, Internship
Work Location(s): San Mateo, CA
**Aria Systems, Inc.**  
**Description of organization:**  
Aria Systems powers recurring revenue for the enterprise enabling market expansion, improving customer relationships, and providing more revenue predictability. The Aria Cloud Billing platform is used by brand name companies such as Pitney Bowes, AAA NCNU, Experian, Red Hat, Ingersoll Rand, EMC, VMware, and HootSuite to evolve their company’s recurring businesses while delivering outstanding customer experiences.

We are looking for talented, passionate people with strong track records and relevant expertise to help us achieve our goals. We are a fast-moving startup that offers a dynamic working environment with a collaborative culture, where you and your peers can learn from each other, and where you can make visible contributions that benefit our world-class customers and partners.

**Job/Internship:**  
This is a paid internship with paid vacation days and holidays, a well-stocked kitchen with lots of snacks and refreshments, weekly-catered lunches, and a great work location in the heart of the financial district of San Francisco.

Interns at Aria would be brought in to work on a very specific project within their departments. Each project is 10 weeks long with milestones throughout as well as a final presentation of their findings. All interns will be part of an intern class with weekly meetings to discuss projects, lunches with executives and other intern-only events.

In other words, if you are looking for an internship to master the copy machine or make coffee for your boss, you should apply elsewhere. Additionally, our intern program is a direct pipeline to full time posts.

**Type:** Computer Software  
**Degree(s):** Bachelor  
**Major(s):** Chemistry/Chemical Engineering, Computer/Physical Sciences, Business Administration, Engineering, Undeclared  
**Position(s):** Summer Job, Internship  
**Work Location(s):** San Francisco, CA

---

**Arista Networks**  
**Description of organization:**  
Arista delivers Cloud Networking solutions for large datacenter and computing environments. Arista builds and sells 10/40/100 gigabit ethernet switches with outstanding scalability, robustness, and price-performance. At the core of Arista's platform is EOS™, a pioneering open, extensible, fault-tolerant software architecture. Arista's team is built of experienced management and engineering talent from leading networking companies and universities.

**Job/Internship:**  
The core responsibility is to deliver product features. A major part of this is writing the code that drives our products. But the role of a software engineer is much bigger than just being a coding machine. Software engineers work on the whole development process. Platform engineers are the blacksmiths of our team. They take the red-hot product straight from the forge with rough faces and sharp corners and turn it into a smoothly running system. The platform engineer bridges the hardware-software boundary, writing code that runs straight on the bare metal and makes sure the hardware is doing what it is supposed to do. The platform engineer is the one who first pushes the "on" button when something comes off the manufacturing floor.

**Type:** Computer Hardware, Computer Software  
**Degree(s):** Bachelor, Masters, Doctoral, Postdoc, Professional  
**Major(s):** Computer Science, Electrical Engineering and Computer Science  
**Position(s):** Full-time, Summer Job, Internship  
**Work Location(s):** Santa Clara, CA / San Francisco, CA
**Aspera Inc.**

**http://www.asperasoft.com**

**Description of organization:**
Aspera, Inc. is a fast-growing startup creating industry leading bulk data transport technologies, in software. Aspera's software products solve the fundamental problems of transferring files, directories of files, and large data sets over the Internet and private IP networks. Built on Aspera's patent-pending fasp transport technology, these products eliminate the bottlenecks of conventional file transfer technologies and dramatically speeds file transfers, even over inherently unreliable international, satellite, and wireless links. The speed adapts to use the available bandwidth and protect other traffic in automatic mode, while allowing the user to adjust individual transfer rates and finish times.

**Job/Internship:**
Responsibilities could include: Assisting the software development team in developing and testing client and server components for Aspera's high performance file transfer suite, including internal libraries, tools and user interface components. Develop and maintain unit tests and automated system tests. Assist in the research and development of plug-ins for third party products utilizing the Aspera SDK, such as video and audio editing tools. Create sample programs and documentation for utilizing Aspera SDK components in browser, web services, and Java/.NET/C++ applications.

Required Skills: Strong programming skills in C/C++ and knowledge of Java or .NET Experience in developing either user interface or system-level software Web application programming and Ruby on Rails a plus

**Type:** Computer Software
**Degree(s):** Bachelor, Masters, Doctoral, Postdoc, Professional
**Major(s):** Electrical Engineering and Computer Science
**Position(s):** Part-time, Full-time, Internship
**Work Location(s):** Emeryville, CA

**Bank of the West Talent Acquisition**

**http://www.bankofthewest.com/careers**

**Description of organization:**
What sets Bank of the West apart from other banks is our team members—they embody the optimistic spirit of the West. There is a spirit here that drives us to do more. Our team of more than 10,000 employees is vital to the success of our Bank. They reflect our modern western values—straightforward, entrepreneurial and optimistic. We seek to create a corporate culture that fosters and rewards excellence, encourages creative thinking and respects diversity – an environment where team members are engaged, supportive of one another and enthusiastic about serving our customers. Bank of the West offers the stability of a company that has a 135 year history and is part of BNP Paribas, a European leader in global banking and financial services and one of the 6 strongest banks in the world.

**Job/Internship:**
Bank of the West is pleased to offer a 10-week Summer Internship position to college students June 15-August 21. By joining our team, you'll have the chance to explore the growing financial services industry. You'll learn from experienced banking professionals and have the opportunity to better define your career prospects. These are paid internships and provide potential for future job placement with one of the country's fastest growing financial services companies.

**Type:** Financial Services
**Degree(s):** Bachelor, Masters
**Major(s):** Computer/Physical Sciences, Business Administration, Communications/Arts, Law

**Bay Area SMACNA**

**Description of organization:**
Bay Area SMACNA represents over 200 union sheet metal and air conditioning contractors in the seventeen Northern California counties of Alameda, Contra Costa, Del Norte, Humboldt, Lake, Marin, Mendocino, Monterey, Napa, San Benito, San Francisco, San Mateo, Santa Clara, Santa Cruz, Solano, Sonoma, and Trinity.

In 2013 our Members' Firms provided employment opportunities totaling in excess of 4,900,000 man-hours throughout the Bay Area. We represent only signatory employers and are part of a National Association of over 1900 contracting firms and 104 local chapters throughout the United States. Our firms employ union sheet metal workers and are signatory through our association to a labor agreement with Sheet Metal Workers International Association--Local 104 (SMWIA).

**Job/Internship:**
The Bay Area SMACNA Intern Program started in 2000 as an excellent employment opportunity for students, as well as a way to introduce the different careers available within the various specialties of the sheet metal construction industry. Bay Area SMACNA has received over 4,000 Intern Applications since the inception of this program and has placed approximately 600 students in intern positions throughout the Greater Bay Area. Many of the Interns have been offered permanent employment after graduating, and many of them have pursued a career as a sheet metal worker in a SMWIA Local 104 Joint Apprenticeship Training Center.

Career opportunities for Bay Area SMACNA Interns include engineering, estimating, design, architecture, project management, construction management, purchasing,

**Type:** Materials and Construction, Engineering

**Work Location(s):** Various Cities, North America. Majority of positions are located in California
**California ISO**

Description of organization:
The California Independent System Operator (ISO) manages the flow of electricity across the high-voltage, long-distance power lines that make up 80 percent of California's power grid. We safeguard the economy and well-being of 30 million Californians by "keeping the lights on" 24/7. The California ISO's function is often compared to that of air traffic controllers. It would be grossly unfair for air traffic controllers to represent one airline and profit from allowing that company's planes to go through before others. In the same way, the California ISO operates independently—managing the electron traffic on a power grid we do not own—making sure electricity is safely delivered to utilities and consumers on time and reliably.

Job/Internship:
May include, but is not limited to the following:
Helping develop designs, assessing stakeholder comments, and summarizing policy issues, proposals and stakeholder comments for Infrastructure Policy Initiatives.
Working on Procedures Lifecycle Management project – implementing workflows, metrics and reporting for the business unit processes.

**INTERN REQUIREMENTS**

Level of Education
Currently in a Bachelor's degree (BS) or Masters degree (MS) program in Economics.
Amount of Experience
This is an entry-level position, no experience required.
Type of Experience
Previous internship or work experience desired
Proficient in Microsoft office suite.
Good presentation, oral and written communication skills highly desirable.

Type: Energy
Degree(s): Bachelor, Masters
Major(s): Information Management & Systems, Computer Science, Business Administration, Mass Communications/Media Studies, Journalism, Public Policy, Agricultural and Resource Economics
Position(s): Internship
Work Location(s): Folsom, CA

**Centro**

Description of organization:
Centro provides unified, cloud-based software to simplify digital media operations. Our media management platform streamlines and scales ad buys across all channels, accessing both guaranteed and biddable inventory, to achieve any campaign objective. Our holistic approach gives marketers a single system of record to fulfill their research, planning, buying, optimization and reporting needs. Since 2001, Centro has successfully planned and executed more than 100,000 national and local campaigns across all digital display platforms and ad format types. Headquartered in Chicago with 33 offices in North America (including San Francisco), Centro’s success and commitment to culture has led to many accolades, including #1 on Crain's Best Places to Work in Chicago in 2011, 2012, 2013 and 2014.

Job/Internship:
Centro was founded in 2001 to bring efficiency to local digital media buying. Today, Centro is building a unified SaaS application that automates and streamlines the entire digital media buying lifecycle - disrupting an industry where purchasing and transactions are still done manually. To deliver this application, we attract talent from an array of disciplines to work in our cross-functional teams. Together we tackle the complexity of scale that comes from performing 30 billion transactions per day and work to unite all the functions of our platform into one seamless and intuitive experience. As an intern you will be helping us design and develop great software in a highly collaborative environment where you will be exposed to a number of projects related to our platform development.

Type: Media  
Degree(s): Bachelor, Masters, Doctoral, Professional

Work Location(s): Santa Clara, CA
**City Year**

**Description of organization:**
City Year is an education-focused nonprofit organization that works to bridge the gap in high-poverty communities between the support that students actually need and what their schools are designed and resourced to provide. In doing so, City Year is helping to increase graduation rates across the country and changing the lives of students.

Founded in 1988, City Year partners with public schools in 26 cities across the United States to identify students who are at risk of not graduating on time with their peers. Our teams of young AmeriCorps leaders support students by focusing on attendance, behavior, and course performance through in-class tutoring, mentoring, and afterschool programs that keep kids in school and on track to graduate.

**Job/Internship:**
City Year AmeriCorps Members:
--Provide one-on-one or small group tutoring before, during and after school to help students work through their academic challenges
--Run afterschool clubs and service projects to give students a positive and safe activity to participate in
--Lead energetic morning greetings for the whole school to create more encouraging learning,
--Take attendance and call late or absent students to encourage them to come to school
--Make positive phone calls home to fill parents and family in on on the progress that's being made
--Organize and lead activities, celebrations and projects to improve the school and community as a whole

DocSend

http://docsend.com

Description of organization:
DocSend is changing the way people communicate with documents by enabling you to know what happens after you send them. Just as Google Analytics made it possible to track and measure website traffic, we’re doing the same for documents. We make it possible to know who opens your docs, when they open them, and what they’re interested in. With this knowledge, salespeople know which prospects to follow up with first, entrepreneurs know which investors they shouldn’t spend more time with, and managers know which employees are reading through content they send. We’re based in San Francisco and co-founded by three Stanford CS grads.

Job/Internship:
Software Engineer Intern:
We’re looking for two software engineer interns: engineers passionate about building high-quality, user-centered products. We’re small, so there’s lots of opportunity for taking ownership of a meaningful piece of our product that will directly impact our business.
Our stack is a Rails web app running on Heroku with CoffeeScript, Haml, and LESS for the front-end bits. We've got a ton of juicy work ahead and would love your help!

Growth Intern:
As a growth intern at DocSend you'd be responsible for running growth experiments to surface new growth channels and measure their success. This could mean blogging, advertising, SEO, events, you name it. We're looking for someone creative, tenacious, and excited to learn!

Type: Computer Software
Degree(s): Bachelor, Masters

East Bay Consortium of Educational Institutions/Cal-SOAP

Description of organization:
The East Bay Consortium of Educational Institutions is a nonprofit educational agency funded to provide academic and advising services to students to prepare them to go to college. Our main academic program is the Pre-Collegiate Academy, a program designed for students in Oakland middle and high schools. PCA was established to increase the number of students who qualify for and attend colleges and universities. PCA works to accomplish this goal by strengthening students' mathematical skills through a summer enrichment program and support services during the year.

Internship/Summer Job: Pre-Collegiate Academy Prospective Math Teachers, 6 positions. Upper division math and science majors and/or minors. $2,500 stipend. June 22 - July 29, 2015.

Job/Internship:
Current upper division college/university math/science majors and minors to participate in one-week summer institute and a special 4-week (5 weeks full time) math summer enrichment for secondary students to be held at Merritt College. The job includes:

- Participating in a one week (June 22 – June 26) Teacher Institute on the use of manipulatives, cooperative learning problem solving, and other teaching strategies;
- Teaching math along with a credentialed math teacher to middle or high school students in the morning for 4 weeks (June 29 to July 29);
- Participating in after class evaluation preparation sessions for 4 weeks (June 29 to July 29);
- Supporting and maintaining the program expectations of PCA students set by the East Bay Consortium.

Type: Education/Higher Education
Degree(s): Bachelor, Masters
Major(s): Statistics, Mathematics, Applied, Mathematics, Science and Mathematics Education, Integrative Biology, MCB-General
Position(s): Summer Job
Work Location(s): Oakland, CA

http://www.egonzehnder.com/

Description of organization:
Egon Zehnder is the largest privately-held executive search firm globally, with more than 420 consultants located across 69 offices in 41 countries. We operate across all industries and our clients range from Fortune 100 firms to mid-cap businesses, not-for-profits, and entrepreneurial ventures. With our unique one-firm culture and consultative approach, Egon Zehnder serves as the advisor of choice to business leaders throughout the world, including at Pepsi, Colgate, Google, Dell, American Express, Bank of America, General Electric, Siemens, Alcoa, Novartis, and GlaxoSmithKline.
Egon Zehnder is the global leader in Executive Search, Board Consulting and Search, and Executive Assessment and Development.

Job/Internship:
Description
• Develop solutions for client mandates in collaboration with colleagues across the global firm.
• Coordinate teams, conduct research, and develop insights for complex projects that will result in a presentation, report, or article for business development or brand-building.
• Conduct general research and analysis, including participating in special projects.
Requirements
Candidates must be Junior, Senior, or recent graduate and have demonstrated a solid academic record. Previous experience in a market research role, familiarity with databases, and acumen with Microsoft Office (Word, Excel, and PowerPoint) are desired. A minimum GPA of 3.3 is preferred. We may request a writing sample as the position requires superior writing skills.

FireEye

Description of organization:
FireEye has invented a purpose-built, virtual machine-based security platform that provides real-time threat protection to enterprises and governments worldwide against the next generation of cyber attacks. These highly sophisticated cyber attacks easily circumvent traditional signature-based defenses, such as next-generation firewalls, IPS, anti-virus, and gateways. The FireEye Threat Prevention Platform provides real-time, dynamic threat protection without the use of signatures to protect an organization across the primary threat vectors and across the different stages of an attack life cycle. The core of the FireEye platform is a virtual execution engine, complemented by dynamic threat intelligence, to identify and block cyber attacks in real time.

**Ford Motor Company**

Description of organization:
Ford is committed to developing great products for customers around the world. In 2014, we are introducing 23 new vehicles globally. Ford saw the largest percentage point gain in U.S. market share among automakers in 2013. In addition, Ford F-Series was the best-selling vehicle in the United States for the 32nd year in a row and Ford Focus was the best-selling nameplate in the world. With the freshest car portfolio in the industry and a commitment to deliver continuous improvement for fuel economy, Ford is well positioned in the global marketplace.

Job/Internship:
The Ford Summer Internship Program provides students with hands-on, career-specific experience through full-time work during summer break (from early-May through the end of August). Students are engaged in networking and educational activities throughout their internship to gain exposure to senior level management and to learn more about Ford, our values and career opportunities.
Most Summer Interns will have just completed their junior year of an undergraduate program or one academic year of a Master's program and are expecting to graduate the following year. Generally, candidates are selected for having top academic standing, as well as exceptional leadership, communication, and self-motivation skills.

Position(s): Full-time, Internship
Work Location(s): San Francisco Bay Area, CA / Seattle, WA / Cambridge, MA / Iowa / Arizona

Guidewire Software, Inc.
Product Development

http://www.guidewire.com/about-guidewire/careers/

Description of organization:
Guidewire sells three enterprise web-based software products to insurance companies that offer Property and Casualty insurance. Our products share a core technology platform that the Guidewire Platform team develops. Our customers domestically and internationally require a highly-configurable reliable technology platform. Writing that kind of software for insurance companies worldwide turns out to be surprisingly complex and difficult to get exactly right. Understanding and rising to that challenge can be rewarding.

Our platform includes an MVC web presentation layer, a cluster-safe persistent data layer, advanced performance tools, an inter-application messaging architecture, and a lot more. The Platform team writes most code in Java, though we use the Gosu language too.

Job/Internship:
Guidewire is offering an internship program for the summer of 2015. The program is designed to give active undergraduate and graduate college students an opportunity to work in a real-world business environment, writing software that people use to make a living. Our customers are insurance companies, and insurance software is surprisingly complex, difficult to get right, and actually a lot of fun to work on.

As an intern, you will learn what it means to be a professional software developer as you work on projects ranging from tools to test automation. Guidewire is an Agile development shop – we do iterative development, break features into stories, work in priority order, encourage pair programming and more.

Type: Computer Software
Degree(s): Bachelor, Masters
Major(s): Computer Science Minor, Computer Science, Information & Data Science, Electrical Engineering and Computer Science, Computational Engineering Science
Position(s): Paid, Summer Job, Internship
Work Location(s): Foster City, CA

**Independent Institute**

Description of organization:
The Independent Institute is a non-profit, non-partisan, scholarly research and educational organization that sponsors in-depth studies of critical social and economic issues. The mission of the Independent Institute is to boldly advance peaceful, prosperous, and free societies grounded in a commitment to human worth and dignity.

Today, the influence of partisan interests is so pervasive that public-policy debate has become too politicized and is largely confined to a narrow reconsideration of existing policies. In order to fully understand the nature of public issues and possible solutions, the Institute’s program adheres to the highest standards of independent scholarly inquiry.

**Job/Internship:**
Are you interested in helping advance the principles of liberty at a premier think-tank? This is your opportunity to effectuate change in American culture while gaining real world work experience at a goals based organization.

**JusticeCorps**

**Description of organization:**
JusticeCorps is an AmeriCorps program whose members provide legal information in the areas of family law, small claims, landlord tenant law and restraining orders to Bay Area litigants who cannot afford attorneys. JusticeCorps members commit to serve 300 hours (one full day or two half days per week) in a Bay Area (Alameda, Contra Costa, Santa Clara, San Francisco and San Mateo Counties) Superior Court Self Help Center over the course of the academic year. They receive over 40 hours of training and a $1,300 AmeriCorps Education Award upon the completion of their service. A small number of full-time fellowships are also available for graduates and graduating seniors.

**Job/Internship:**
JusticeCorps members and fellows provide direct assistance to self-represented litigants under the supervision of attorneys.

**KLA-Tencor Corporation**

**University Relations**

http://www.kla-tencor.com

**Description of organization:**

Company Information:

Who are we? We research, develop, and manufacture the world's most advanced inspection and measurement equipment for the semiconductor and nanoelectronics industries. We enable the digital age by pushing the boundaries of technology, creating tools capable of finding defects smaller than a wavelength of visible light. We create smarter processes so that technology leaders can manufacture high-performance chips—the kind in that phone in your pocket, the tablet on your desk and nearly every electronic device you own—faster and better. We're passionate about creating solutions that drive progress and help people do what wouldn't be possible without us.

The future is calling. Will you answer?

**Marketo Software**

http://www.marketo.com/

**Description of organization:**
Marketo is the leader in digital marketing software and solutions. Our mission is simple: to help marketers master the art and science of digital marketing.

We’ve built the most innovative Engagement Marketing Platform for marketers to master the art and science of digital marketing. We deliver software that helps marketing understand its target audience, engage them as individuals on their terms, measure the impact of their marketing efforts, and manage the team for success. We are the only company delivering innovation at the rapid speed needed to help marketers keep pace with the demands of an ever-changing digital world.

We have created the most complete marketing ecosystem of technology providers, service experts, and agencies in the world. We are for marketers, by marketers.

**Job/Internship:**

Engineering Internship:
Marketo is looking for an intern with experience in software design, coding and debugging. Our engineering team is a dynamic organization with bright and talented members. These dedicated individuals collaborate with each other everyday to use a wide range of technologies, such as Node.js, Solr, Mongdb, Cassandra, Spark, Scala and LAMP, to build the industry leading Marketing Automation products for our valuable customers.

Marketo values diversity, we not only have multiple engineering offices in various continents, but we also have engineers from all over the world. In addition, we are a fun loving team with monthly hackathons and happy hours. Our engineers participate in a variety of extra-curricular activities like table-tennis, badminton, jogging, volleyball, and cricket.

Marketing Internship:
During Marketo’s internship program, you will be able to immerse yourself within our marketing team and gain a deep understanding of not only our business, but more broadly, our ecosystem.

What you can expect: Meaningful work: you will work on real life projects that impact our business – not busywork. Personal growth: working in a professional environment will allow you to put into practice the theories and concepts you've learned in school while learning from leader in the marketing realm. Expanding your network: making connections in the industry is critical. Being an intern at Marketo will help you build personal relationships with respected people in the industry as well as fellow intern

### MobiTV

**Human Resources**

[http://www.mobitv.com](http://www.mobitv.com)

**Description of organization:**
MobiTV, Inc. is a leading provider of comprehensive managed services that deliver live and on-demand television and related media content across mobile devices, tablets, personal computers and other Internet-enabled consumer electronics. MobiTV’s proprietary converged media platform is quick to deploy and easy to integrate with customers’ existing systems and networks. The TV Everywhere solution, available nationally and internationally, allows the company to efficiently and reliably deliver high-quality television and video solutions anytime, anywhere, on any device.

**Job/Internship:**
As a Software Engineer at MobiTV, you will help develop our next generation of products using a variety of technologies, programming languages, and development environments. As a part of the platform development team, you will work with our latest technology and be able to influence how people discover and consume TV and video services in the future. The role is focusing on Android development, but the position will allow you to stay current across all major mobile platform technologies.

**Type:** Computer Software, Media, Other, Engineering

**Degree(s):** Bachelor, Masters, Doctoral

**Major(s):** Computer Science Minor, Computer Science, Information & Data Science, Engineering Science (undeclared), Engineering Mathematics and Statistics, Computational Engineering Science

**Position(s):** Internship

**Morpho Detection**

Description of organization:
Morpho Detection is a leader in explosive and narcotics detection for aviation safety, checked baggage screening, military & critical infrastructure protection and new growth platforms in Chem/Bio, X-ray and Radiation/Nuclear detection. Morpho Detection was formed in September 2009 by the acquisition of GE Homeland Protection by Sagem Sécurité (Safran Group). The Safran group operates worldwide, through offices and facilities in Europe, the Americas, Africa and Asia-Pacific. Through this global presence we enhance our competitiveness, while building industrial and commercial relations with the world's leading prime contractors and operators. Our international development strategy reflects our commitment to delivering fast, local service to customers around the world.

Job/Internship:
Morpho Detection, LLC is looking to hire a Software Engineering Intern for this coming summer. We are looking for a paid intern to work with us on a variety of projects. The intern will be responsible for writing automation tools to validate the performance of our CTX scanners in various scenarios and recording the performance in each of these scenarios. During this internship, the intern will have an opportunity to understand the complex interactions that go into making the scanners. The intern will also understand the software development model and tools used in developing and maintaining the software for these systems. As part of the team, the intern will get to interact with an experienced team of engineers and understand the challenges faced.

**National Instruments**

Description of organization:
National Instruments, a technology pioneer and industry leader in virtual instrumentation since 1976, has worked with engineers and scientists to provide answers to the most challenging questions. Through these pursuits, NI customers have brought hundreds of thousands of products to market, overcome innumerable technological roadblocks, and engineered a better life for us all. If you can turn it on, connect it, drive it, or launch it, chances are NI technology helped make it happen. Headquartered in Austin, Texas, NI has more than 7,100 employees worldwide and direct operations in more than 50 countries. NI is frequently recognized for its friendly and inspiring work environment by such publications as FORTUNE, BusinessWeek, and Electronic Design.

Job/Internship:
As an NI Software Engineer Intern or Co-op I, you will enjoy the unique opportunity to be exposed to many aspects of the product development cycle. By the end of your intern or co-op term, your project will contribute to NI’s bottom line success. Software development project opportunities include development tools, compiler design, graphical user interface, kernel-level drivers, instrument drivers, networking, embedded and real-time systems, automated data acquisition systems, and mathematical analysis.

Nielsen

Description of organization:
As a global leader in measurement and information, we believe providing our clients a precise understanding of the consumer is the key to making the right decisions -- decisions that can lead to profitable growth. At Nielsen, we’re always innovating to keep pace with emerging market trends and the increasingly diverse, demanding and connected consumer.

After nearly a century, we’re more focused and skilled than ever at providing the complete view of what consumers watch and buy through powerful insights that clarify the relationship between content and commerce. Whether our clients are in media, consumer packaged goods, telecom or advertising, our expansive data and measurement capabilities provide market context and confidence through our long history of innovation and integrity.

Job/Internship:
As an Intern within the Professional Services Analytics Program (PSAP), you will build and grow relationships with some of our several hundred clients across the world, including clients like Coca-Cola, Kellogg’s, General Mills, SC Johnson, Target, Wal-Mart, Procter & Gamble and Unilever, to name a few.

As an Intern, you will experience our Professional Services organization first hand by conducting research and analysis for client deliverables, interacting with the client and account teams and collaborating across our organization to support key business and process improvement initiatives. Your internship assignment will allow you to demonstrate your analytical aptitude, engage in Analyst-level work, and showcase your educational knowledge and skills.

Nitro

http://www.gonitro.com

Description of organization:
At Nitro, we're changing the way the world works with documents. From the desktop to the cloud, we make it easy to create, edit, share, sign and collaborate—online or offline. More than 490,000 businesses run Nitro, including over 50% of the Fortune 500. We're the PDF software partner of choice for Lenovo®, and our award-winning products, including Nitro Pro and Nitro Cloud, are used by millions of people every month in nearly 200 countries. Australian-founded, we're headquartered in downtown San Francisco with offices in Melbourne, Australia; Dublin, Ireland; Nitra, Slovakia; and St. Petersburg, Russia. One of the fastest-growing private companies in the world, Nitro is also a multiple Inc. 500/5000, BRW Fast 100, Deloitte Technology Fast 50 and Software 500 award winner.

Job/Internship:
We're looking for intellectual rock stars, currently in pursuit of an undergraduate or graduate degree with a strong interest in technology. Being a paid, summer intern at Nitro isn’t about getting coffee and making copies. You will be immediately integrated into the team, hands-on, and owning projects that directly impact how we do business. Attend meetings, be asked for input, and join us for the extracurricular too: off-sites, happy hours, and Ping-Pong. In other words, you’ll be a Nitronaut. Nitro encourages interns to explore the possibilities of life after college, learn marketable skills with us, and grow as individuals. Work alongside our talented and energetic team, and discover what being a Nitronaut is all about.

NodePrime

http://www.nodeprime.com

Description of organization:
NodePrime was founded by Ex-Dell Engineers that were helping customers build and scale some of the world's largest private cloud deployments. Through these efforts, it became clear that a vendor agnostic solution was needed for aggregating, analyzing and automating machines and the data they generate at scale. If you are looking to solve real, hard customer problems and build products that scale to billions of devices and trillions of metrics, this is the place to be. Our technology is built around a micro-services architecture primarily based on Node.js, GO and proprietary technologies. The company is located in the heart of SOMA on Howard St between 4th and 5th.

Job/Internship:
All interns will be paired directly with relevant teams and be assigned a mentor. All interns will work on core projects for our product that ships directly to our customers.

Type: Computer Software
Degree(s): Bachelor
Major(s): Computer Science, Electrical Engineering and Computer Science
Position(s): Full-time, Internship

ON Semiconductor

Description of organization:
ON Semiconductor (Nasdaq: ONNN) is driving innovation in energy efficient electronics, empowering design engineers to reduce global energy use. The company offers a comprehensive portfolio of energy efficient power and signal management, logic, discrete and custom solutions to help customers solve their unique design challenges in automotive, communications, computing, consumer, industrial, LED lighting, medical, military/aerospace and power supply applications. ON Semiconductor operates a responsive, reliable, world-class supply chain and quality program, and a network of manufacturing facilities, sales offices and design centers in key markets throughout North America, Europe, and the Asia Pacific regions.

Job/Internship:
ON Semiconductor is currently looking for summer 2015 Applications and Design interns! This is a special opportunity for a student who would like exposure to hands-on experience with an innovative company. The intern will complete a summer internship in Phoenix, AZ that will potentially transition into a full-time opportunity in our Japan site.

Requirements:
- Must be currently enrolled Electrical Engineering student
- Must speak, read, and write fluent Japanese
- Basic programming courses completed
- Semiconductor courses preferred
- Degree program should be focused on Analog/Mixed Signal background
- Must be able to relocate to Phoenix for the 2015 summer
- Must be willing to relocate to Japan if offered a full-time position

Optimizely
https://www.optimizely.com/

Description of organization:
Optimizely has created a world-class optimization platform that’s easy to use in an effort to provide a platform for businesses to be able to conceive and run experiments that helped them make better data-driven decisions.

The Highlights:
-In less than two years, our first product has passed established players to become the leading A/B and multivariate testing platform in the world.
-More than 8,000 enterprises have adopted Optimizely including Sony, Disney, and Salesforce.
-From March 2012 to March 2013, the company increased its revenue by more than 400% percent year-over-year. It first reached cash flow positive in 2011.

We're Hiring!
Our happy customer base is growing and so are we. We are actively looking for spectacular people to join our team.

Job/Internship:
Associate Product Manager: build products that users love, and does whatever is necessary to ensure those products are both successful in the market and advance Optimizely's mission. As a charter member of our product management team, you'll help our growing engineering team define, build, and launch products and features in exciting areas like mobile, analytics and measurement, and our customer data platform.
Software Engineer, you will play a central role in the design and implementation of our product. You will collaborate with designers, product managers and fellow engineers to deliver exciting new features and products to our ever-growing customer base. We have an amazing internship program to help set you up for future success as a software engineer.

Pacific Northwest National Laboratory

Description of organization:
What if you could discover dark matter... curb U.S. dependence on foreign fuel... clean up an oil spill... or save the world from acts of violence before they happen—all by making a vital scientific discovery today? Better yet, what if you could improve humanity for generations to come by finding and nurturing the scientists who will discover a myriad of ways to improve the world around us? Would you? We are.

At Pacific Northwest National Laboratory, our mission is to transform the world through courageous discovery and innovation. Our vision: PNNL science and technology inspires and enables the world to live prosperously, safely, and securely. Our values of integrity, creativity, collaboration, impact and courage provide the foundation for all we do.

Job/Internship:
Various internship and post graduate positions (Sophomore - PhD): Computer Science, Nuclear Engineering, Physics, and many more.

**Pandora Media Inc.**

**Description of organization:**
At Pandora, we're a unique collection of engineers, musicians, designers, marketers, and world-class sellers with a common goal: to enrich lives by delivering effortless personalized music enjoyment and discovery. People—the listeners, the artists, and our employees—are at the center of our mission and everything we do. Actually, employees at Pandora are a lot like the service itself: bright, eclectic, and innovative. Collaboration is the foundation of our workforce, and we're looking for smart individuals who are self-motivated and passionate to join us. Be a part of the engine that creates the soundtrack to life. Discover your future at Pandora.

**Job/Internship:**
Just as a “Roadie” serves as a catch-all term for the working technicians who assist all aspects of production for the band, Pandora’s Road Crew Program is structured around the same principles and our “Roadies” support all areas of our business during their 10 weeks at Pandora. The Road Crew Program is focused on developing and fostering relationships with smart, self-motivated, and passionate college students through on the job-training, mentoring, education, and career-pathing exercises to help them discover their future at Pandora.

**Position(s):** Paid, Full-time, Internship  
**Work Location(s):** Oakland, CA / New York, NY / Chicago, IL / Santa Monica, CA

---

**Patreon**

**Description of organization:**
Patreon makes it possible for artists and creators to get paid for their creations by allowing fans to become patrons of their work. Everyone in the Patreon family is deeply invested in the mission of paying creators and empowering the emerging creative class. Our goal is nothing short of changing the very way in which creators are paid for their work, moving from ad-supported creations back to “old-school” Medici style patronage. In just one year, over 50,000 creators have joined our ranks, along with 200,000 patrons. Together, we're sending more than $1.5 million each month to artists, making it possible for them to continue populating the internet with beautiful things that millions of people enjoy.

**Job/Internship:**
Software Engineer - Intern  
**Who you are:**  
You are the puzzlemaster! Ok, maybe not the puzzlemaster, but you understand complex problems and how to tackle them. You communicate well with people and grasp ideas easily.  
**What you would do:**  
- Help us build the backbone of Patreon.  
- Implement new features and optimize existing ones.  
- Rapidly fix bugs and solve any issues that might arise.  
**Skills you possess:**  
- Solid understanding of the full web technology stack. (e.g. HTTP, cookies, headers, asset loading, caching.)  
- Familiar with databases. (MySQL, PostgreSQL)  
- Bonus points if you're familiar with: Python, Java/Scala, PHP, JQuery, Node.js, Ruby, MVC frameworks, API development, DevOps.  

**Type:** Arts and Entertainment  
**Degree(s):** Bachelor, Masters, Doctoral, Postdoc, Professional  
**Major(s):** All Majors  
**Position(s):** Paid, Full-time, Summer Job, Internship  
**Work Location(s):** San Francisco, CA
Peace Corps
West Coast Regional Office

http://www.peacecorps.gov

Description of organization:
Peace Corps service is a life-defining leadership experience with a mission of promoting world peace and friendship. Since 1961, the Peace Corps has shared with the world America's most precious resource – its people. Peace Corps Volunteers currently serve in more than 60 countries in Africa, Asia, the Caribbean, Central and South America, Europe, the Pacific Islands, and the Middle East.

The many benefits of Peace Corps service include:

- No fee to participate
- Travel to and from country of service
- Monthly living & housing allowance
- Language training

Job/Internship:
All volunteers are assigned to one of six sectors: Health, Education, Environment, Agriculture, Business, or Community Development.
Volunteers serve in the Peace Corps for 27 months. Every volunteer starts out their service with three months of intensive training. During training Volunteers learn the local language(s) and customs, technical skills, and safety and security information. After training volunteers live in their community or site for two years. Some volunteers live in small villages and others live in large cities. Volunteers continue to participate in technical and security trainings throughout service.

### Piazza

**Description of organization:**
Piazza is an online Q&A platform that hundreds of thousands of students at all the top universities are using. Professors and students at MIT, Stanford, Princeton, Berkeley and Harvard were the first to adopt it when we launched in 2011. Piazza users spend an average of 2-3 hours a night on the site. Piazza is truly changing the way students learn.

**Job/Internship:**
We're looking for successful people who are looking not only to succeed, but to do something important. We're looking for talented people who believe that education can be more meaningful, more collaborative, and more democratic. In a word: better. We're looking for people who get really excited by products that fit their function beautifully, spread by word of mouth because they're sweet, and engage their users for hours at a time. We're looking for people who love to challenge themselves: to move faster; to code cleaner; to take leadership roles; to make big decisions. We're looking for people who love our product. We're fortunate that thousands of talented people use Piazza every day and want to improve it. It would be great if you felt that way.

Public Defender Service for the District of Columbia

http://www.pdsdc.org/InternshipsAndClerkships/Internships.aspx

Description of organization:
The Public Defender Service for the District of Columbia (PDS) provides and promotes quality legal representation to indigent adults and children facing a loss of liberty in the District of Columbia and thereby protects society's interest in the fair administration of justice. PDS is regarded as one of the best public defender offices in the country—local or federal. It is the benchmark by which other public defender systems often measure themselves.

Job/Internship:
The Criminal Law Internship Program (CLIP) is a fast paced, hands-on investigative internship program for undergraduate and graduate students. Intern Investigators spend at least 12 weeks at one of the most prestigious public defender offices in the nation. Our interns don’t just sit in the office all day copying files. Partnered together, they work directly with staff attorneys to complete various investigative tasks and zealously advocate for their clients.
All applicants must apply through our site at http://www.pdsdc.org/InternshipsAndClerkships/Internships.aspx

State Board of Equalization

http://www.boe.ca.gov

**Description of organization:**
The State Board of Equalization (BOE) offers a challenging career to anyone wishing to actively participate in an internationally recognized tax agency. As one of California's largest tax agencies, the BOE has set the standard for the effective and sophisticated administration of tax programs. Currently the tax programs administered by the BOE are concentrated in four general areas: sales and use taxes, property taxes, special taxes and the tax appellate program. BOE-administered revenues support hundreds of state and local government programs and services, including schools and colleges, hospitals and health care services, criminal justice, correctional, and social welfare programs, law enforcement, consumer services, natural resource management, and transportation and housing programs.

**Job/Internship:**
Under the close supervision and in a learner capacity, the Student Assistant will assist in the performance of administrative and/or technical duties in relation to their field of study for various programs administered by the California State Board of Equalization (BOE). The incumbent will learn policies and procedures related to BOE and will perform meaningful tasks which are valuable and necessary to the program of the department. Duties may include assisting professional staff in contacting taxpayer’s by telephone and/or in person regarding rules and regulations administered by BOE, providing the highest quality of customer service to our internal and external customers and summarizing information and/or data verbally or in writing for business or technology use.

**Sungevity**

**Description of organization:**
The Company
Sungevity is one of the world’s leading and fastest growing residential solar companies. Our success tracks to three priorities. First, we are obsessed with customer service and are committed to making the happiest customers in our, or any, industry. Second, we are a technology-led business, well known for inventing Remote Solar Design, and leading the solar industry with software innovations that make going solar easier and cheaper. And finally, our business is designed to partner and grow with leading organizations from Lowe’s to E.On, GE to Sierra Club.
Sungevity currently operates in 11 US states, Netherlands and Australia.

**Job/Internship:**
The Position
Interns work on Special Projects and are responsible for supporting cross-functional initiatives and strategic analyses at Sungevity as well as tracking and forecasting policy changes relevant to Sungevity. Previous interns have worked in the Finance, Marketing and Sales Departments.

**Synopsys, Inc.**  
http://www.synopsys.com/careers

*Description of organization:*  
Synopsys, Inc. (Nasdaq:SNPS) provides products and services that accelerate innovation in the global electronics market. As a leader in electronic design automation (EDA) and semiconductor intellectual property (IP), Synopsys' comprehensive, integrated portfolio of system-level, IP, implementation, verification, manufacturing, optical and field-programmable gate array (FPGA) solutions help address the key challenges designers face such as power and yield management, system-to-silicon verification and time-to-results. These technology-leading solutions help give Synopsys customers a competitive edge in quickly bringing the best products to market while reducing costs and schedule risk.

*Job/Internship:*  
As an Intern for the hardware engineering team, you will be part of a team of architects and design engineers working on advanced microprocessor IP design. You will be working with a team that has a strong understanding of microprocessor architecture, design, verification and implementation flow. Responsibilities may be quite diverse in technical area.

**Requirements:**  
Good knowledge of digital design, microprocessor architecture, programming at assembly and C/C++ level would be essential. Knowledge of scripting and VLSI design methodologies would be desirable. The person will need to have problem-solving skills, good interpersonal skills and ability to interact with global teams. Resumes must include GPA, relevant coursework, dates of availability, and graduation dates.

**Type:** Computer Software, Engineering  
**Degree(s):** Bachelor, Masters, Doctoral  
**Major(s):** Computer Science, Electrical Engineering and Computer Science  
**Position(s):** Full-time, Internship  
**Work Location(s):** California / North Carolina / Texas / Oregon
**Target**

Description of organization:
At Target, we have a vision: to become the best – the best culture and brand, the best place for growth and the company with the best reputation. It takes the best to become the best, and we are committed to building a team that does the right thing for our guests, shareholders, team members and communities.

Target Corporation serves guests at more than 1,700 stores throughout the U.S. and at Target.com. Target will open over 100 locations in all 10 provinces across Canada in 2013. The company is headquartered in Minneapolis, Minnesota with additional headquarters locations in the U.S. in Arizona, New York, South Dakota and Utah; in Bangalore, India; and in Mississauga, Ontario, Canada.

Job/Internship:
Use your skills, experience and talents to be a part of groundbreaking thinking and visionary goals. As a Stores Executive Intern, you'll take the lead as you…

- Gain a significant knowledge base during your comprehensive training program
- Work closely with the senior leadership group
- Gain the opportunity to make an impact within a Target store as an executive-in-training and project leader
- Offer innovative ideas and focusing on results, and inspire your team to do the same
- Receive extensive training to help you become a strong store executive leader
- Return to school with strengthened leadership and project management skills, and a better understanding of the outstanding opportunities at Target

Work Location(s): San Francisco Bay Area, CA

**tCell.io Inc**

Description of organization:
80% of all security breaches are application related, and current technologies are failing to keep up with the increasing sophistication of attackers. tCell is an early-staged stealth startup-up reinventing application security for the modern web. Founded by senior leaders from Splunk and Okta, tCell will enable customers to defend their web applications, API services, and Mobile backends in production from attack. This product is built from the ground up for the world of cloud infrastructure and rapid deployment. Based on a data-driven approach to provide real-time security with low false positives, tCell will enable customers to keep innovating while remaining secure.

Job/Internship:
Interns will work closely with Software Engineers to develop new features for the product. Work will include research, prototyping, proofs-of-concept, testing, design, and coding. From the internship, the intern will learn about application security, functional programming, data modeling, test techniques, data processing, and all the various aspects that go into creating an innovative new product.

Type: Computer Software  
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional  
Major(s): Statistics, Computer Science, Electrical Engineering and Computer Science  
Position(s): Paid, Part-time, Student Employment, Full-time, Summer Job, Internship  
Work Location(s): San Francisco, CA
Tesoro Companies, Inc.

Description of organization:
Tesoro Corporation, a Fortune 100 company, is an independent refiner and marketer of petroleum products. Tesoro, through its subsidiaries, operates six refineries in the western United States with a combined capacity of 850,000 barrels per day. Tesoro’s retail-marketing system includes over 2,250 retail stations under the Tesoro®, Shell®, ARCO®, Exxon®, Mobil® and USA Gasoline™ brands.

Job/Internship:
Interns will gain practical, hands-on experience and training that will provide an opportunity for growth, learning and development within the Logistics, Refining and Marketing industry. Interns will support project-driven work and/or operational responsibilities in support of one of the following Business Units:
- Environmental, Health, Safety & Security
- Logistics
- Refining Operations

Through orientation and professional development offerings, Tesoro’s Interns will gain exposure to the above mentioned Business Units and the industry while engaging in goal setting, performance reviews and networking.

**TM Financial Forensics**

Description of organization:
TM Financial Forensics (TMF) is a business and disputes consulting firm with offices in San Francisco, Los Angeles and Chicago, specializing in financial, accounting, economic and damages analyses. Our professionals assist companies and outside counsel in resolving complex business and litigation challenges. Our strength lies in our deep industry experience, commitment to client service, resourcefulness and ability to quickly and effectively respond to client needs. TMF has worked on high-profile cases both domestically and internationally, on disputes ranging from intellectual property infringement to financial fraud.

Job/Internship:
As a part of a team, Associates/Interns perform financial, statistical and economic data collection and analyses. Teams work on a variety of assignments across a broad range of industries and practice areas, primarily related to litigation, arbitration, mediation or settlement negotiations. Specific analyses may include the calculation of lost profits and economic damages, as well as business valuations and the determination of royalties, as examples.

**TrueCar, Inc**

Description of organization:
TrueCar's mission is to transform the car-buying experience for consumers and the way that dealers attract customers and sell cars. We have established an intelligent, data-driven online platform operating on a common technology infrastructure, powered by proprietary data and analytics. We operate our company-branded platform on our TrueCar.com website. In addition, we customize and operate our platform for affinity group marketing partners, such as USAA and Consumer Reports, financial institutions, and other large enterprises such as Boeing and Verizon. We enable users to obtain market-based pricing data on new and used cars, and to connect with our network of TrueCar Certified Dealers.

Job/Internship:
TrueCar is the best car buying service in the country. Our programs have sold over 1.1 million cars, saving consumers over $3.4 billion. We power car buying programs for over 124 partners including some of the nation’s largest and most respected service organizations, including American Express, Consumer Reports, PenFed, Nationwide, GEICO, USAA and hundreds more.
We’re looking for a Software Engineer - Intern who is passionate about making fast, scalable, and well-designed web interfaces for a high visibility consumer-facing site. You will be utilizing the latest web technologies to solve challenging problems, create innovative web applications from the ground up and understand exactly what it takes to create an outrageously good Web experience for our customers.

**WalkMe**

**Description of organization:**
WalkMe™ is an interactive online guidance and engagement platform. WalkMe™ provides a cloud-based service designed to help professionals – customer service managers, user experience managers, training professionals, SaaS providers and sales managers – to guide and engage prospects, customers, employees and partners through any online experience. We’ve designed a platform which helps businesses eliminate online confusion, while at the same time raise efficiency and reduce costs.

**Job/Internship:**
WalkMe Junior Professional Services
WalkMe is looking for a junior Professional Services role who will be a part of the team that scopes, designs, develops and deploys solutions for our customers using the WalkMe product. This role requires a natural excitement and ability to learn technologies and explain technical issues to a variety of audiences, including enterprise architects, developers and management.

This role will help design customer use cases and will be able to quickly assess them and come up with creative solutions.

This role will be best for those who thrive on goal and result-oriented tasks.

You want the opportunity to make an impact and accomplish more in a close-knit and nimble startup.

You enjoy collaborating with (and learning from) experts in engineering.

**Type:** Computer Software  
**Degree(s):** Bachelor  
**Major(s):** Chemistry/Chemical Engineering, Computer/Physical Sciences, Business Administration, Engineering  
**Position(s):** Paid, Full-time, Summer Job, Internship  
**Work Location(s):** San Francisco, CA
**Walmart Global eCommerce**

Description of organization:
Company Summary
By bringing together online, mobile, and social with our 11,000+ stores around the world, Walmart eCommerce is creating a seamless experience for customers to shop in the way that’s most convenient for them—anytime and anywhere. When you combine our unmatched assets in retail with our commitment to building best-in-class eCommerce capabilities, we’re positioned to serve customers in ways no one else can.

Job/Internship:
Data Scientist:
@WalmartLabs is hiring a number of data science interns to support projects in all areas of the business. The areas of impact include (but are not limited) to the following areas
- Personalization and Categorization
- Optimization
- Decision-making
- Retrieval

Below are actual examples of projects that our interns have worked on:
- On-demand personalized recommendation
- Extracting attribute values
- Optimizing campaigns for better results
- Enhancing the product matching infrastructure
- Developing demand forecasting models

**Works Applications Co., Ltd.**

Description of organization:
Works Applications is the only company that has won top share in a single country ahead of European and North American ERP vendors such as SAP and Oracle. Our ERP package "COMPANY" is a business software suite geared for large corporations in any industry. The HR series in COMPANY holds the No.1 market share and is considered the de facto standard by major Japanese corporations, along with the accounting series and SCM series. Works Applications was named No. 1 Best Workplace in 2010, No. 2 in 2011, No. 2 in 2012, and NO. 4 in 2013, making the top five in Japan for four years in a row.

Job/Internship:
(1) Be an explorer in cutting edge technologies
Be on the lookout for the latest technologies and conduct research on their practical applications in products. Specific duties may include:
Apply new technologies to resolve plans and functions that are impossible using existing technologies.
Implement new technologies to significantly improve existing products and functions.
(2) Software architect role
Oversee the entire planning, design and installation processes for new products and functions.
Create new products and functions while assuming full authority over assigned areas.
Engage proactively in the planning, design and installation processes, rather than entirely relying on instructions from the client.

Type: Computer Software, Engineering
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): Electrical Engineering and Computer Science, Computational Engineering Science, Applied Science and Technology
Position(s): Full-time, Internship
Work Location(s): Shanghai / Singapore / Tokyo
YapStone, Inc.
