Past Fair Directory (Log into Callisto 3 weeks prior to fair for current directory)

Spring Career Fair
January 28-29, 2015 11am-4pm
Recreational Sports Facility (RSF)
Hosted by the Career Center, Alpha Epsilon Zeta (AEZ), Berkeley Women in Business (BWIB), Tau Beta Pi (TBP)

Provides an opportunity to interact with employers early in the Spring Semester for entry-level career positions, summer, and internship opportunities. Attracts 2000+ each day, primarily graduating students representing all academic majors, and 160+ employers.

A9

Description of organization:
A9.com, an Amazon company, creates powerful, customer-focused search and advertising solutions and technologies. At A9, you’ll experience the benefits of working in a dynamic, entrepreneurial environment, while leveraging the resources of Amazon.com (AMZN), one of the world's leading internet companies. We provide a highly customer-centric, team-oriented environment in our offices located in Palo Alto, California.

A few fun facts about A9:
• Powers the product search engine for Amazon sites around the world
• Has an entire team dedicated to using computer vision to help people discover the world around you
• Provides search as a service for customers of AWS
• Has an advertising team focused on providing quality advertising for publishers and more relevant ads for customers

Job/Internship:
We will be attending for internships and full-time positions. We look for developers, data scientist, and data analytics enthusiasts.
We hire Bachelors, Masters, and PhD Students.
We look for students interested in: Machine learning, Algorithms, backend infrastructure, distributed systems, mobile, NLP, Augmented Reality, computer vision, Analytics, data mining, pattern recognition, AI, OCR, and much more.
We are a subsidiary of Amazon that focuses on intelligent and intuitive search and advertising technologies. Our internship program is in Palo Alto, CA. We have an extremely competitive compensation package, we pay for flights, ground transportation, and baggage. We offer a housing stipend… all to make it easy for interns to come work for us.

Type: Engineering
Degree(s): Bachelor, Masters, Doctoral
Major(s): Engineering, Mathematics and Statistics, Electrical Engineering and Computer Science
Position(s): Full-time, Internship
Work Location(s): Palo Alto, CA

### Altera Corporation

**Description of organization:**
Altera Corporation (NASDAQ: ALTR) is the pioneer of programmable logic solutions, enabling system and semiconductor companies to rapidly and cost effectively innovate, differentiate, and win in their markets. Altera offers FPGAs, SoCs with embedded processor systems, CPLDs in combination with software tools, intellectual property, embedded processors and customer support to provide high-value programmable solutions to over 12,000 customers worldwide.

Altera was founded in 1983 and had annual revenues in 2013 of US$1.7 billion. Altera is headquartered in San Jose, California, and employs more than 3,000 people in over 20 countries.

**Job/Internship:**
Altera's cutting edge FPGAs & HardCopy ASICs require increasingly complex software. You are a Software/Hardware Engineer who wants to build key components of this software, are excited by learning about new technologies, & are motivated by being part of a team that is critical to the success of Altera.

The successful candidate's minimum qualifications will include the following:
- BS in CE, EE, CS or equivalent
- Strong understanding of RTL coding principles including proficiency in Verilog/VHDL
- Proficiency in scripting languages (Perl, TCL)
- Extensive experience with large code bases in C &/or C++, (Python and/or Java)
- Knowledge of object-oriented programming, data structures & algorithms
- Strong background in data-structure & algorithm implementation in C/C++

**Type:** Computer Hardware, Computer Software, Engineering  
**Degree(s):** Bachelor, Masters, Doctoral  
**Major(s):** Computer Science, Electrical Engineering and Computer Science  
**Position(s):** Full-time, Internship  
**Work Location(s):** San Jose, CA
Altria Group

Description of organization:
Altria Group is a FORTUNE 200 company that owns the premier tobacco companies in the United States including Philip Morris USA, U.S. Smokeless Tobacco Company, John Middleton and Nu Mark. The companies’ premium tobacco brands include Marlboro, Copenhagen, Skoal and Black & Mild. Altria also owns Ste. Michelle Wine Estates, one of the country’s top premium wine producers and Philip Morris Capital Corporation, an investment company. Altria’s mission is to own and develop financially disciplined businesses that are leaders in responsibly providing adult tobacco and wine consumers with superior branded products.

Job/Internship:
Are you ready for an experience that can’t be beat? Currently, Altria is looking for leaders on campus who are seeking either a summer internship or a full time position where they can apply their skills to sell and consult our trade partners. We currently have opportunities for a project-based 10 week paid summer internship, including possible housing allowances, with a focus on sales and analytics. Additionally, we are seeking students interested in a full-time position as a Territory Sales Manager, leading a business consisting of ~$15MM in annual sales.

Type: Consumer Products
Degree(s): Bachelor
Major(s): All Majors
Position(s): Full-time, Summer Job, Internship
Work Location(s): Northern California

Analog Devices, Inc

Description of organization:
Analog Devices, Inc. (ADI) is a world-leading semiconductor company specializing in high-performance analog, mixed-signal and digital signal processing (DSP) integrated circuits (ICs). ADI was founded in 1965 by two MIT grads, one of whom, Ray Stata, is still involved as Chairman of the Board. Since then, its focus has been to solve the engineering challenges associated with signal processing in electronic equipment. ADI’s products play a fundamental role in converting real-world phenomena such as temperature, motion, pressure, light and sound into electrical signals to be used in a wide array of applications. Our employees are proud to know that the chips/chipsets they help design, test, manufacture and sell are making the world more productive and fun!

Job/Internship:
Analog Devices, Inc. (NASDAQ: ADI) defines innovation and excellence in signal processing. ADI’s analog, mixed-signal, and digital signal processing (DSP) integrated circuits (IC) play a fundamental role in converting, conditioning, and processing real-world phenomena such as light, sound, temperature, motion, and pressure into electrical signals to be used in a wide array of electronic equipment.

Type: Electronics and Misc. Tech, Engineering
Degree(s): Bachelor, Masters
Major(s): Chemical Engineering, Computer Science, Business Administration, Materials Science and Engineering, Industrial Engineering and Operations Research, Electrical Engineering and Computer Science, Computational Engineering Science
Position(s): Full-time, Internship
Work Location(s): Norwood and Wilmington, MA / Greensboro, NC / San Jose, CA
**Andersen Tax**

**Description of organization:**
Andersen Tax is one of the largest national independent firms focused on providing a wide range of tax, valuation, financial advisory and related consulting services. Andersen Tax has a growing presence in Europe with 1,000 people in 29 offices worldwide.

At Andersen Tax, our employees are given the opportunity to work on complex projects with marquee clients and the ability to advance professionally in a workplace setting that both cultivates and rewards the enhancement of technical knowledge and skills. We foster an environment based on learning and allow our employees to grow through hands on work experience, participation in training programs, and strong mentoring relationships.

**Job/Internship:**
Valuation Interns serve as members of client service teams. Interns are staffed on engagements similar to an Associate and receive formal and on-the-job training to hone and develop their technical skills. The Valuation Services group performs valuations of closely held companies, intangible assets, debt instruments, and other assets for tax and financial statement reporting, mergers and acquisitions, strategic planning, and other purposes. Interns assist in company, industry and market research, spreadsheet modeling, financial analysis and report writing.

**Type:** Accounting Services, Financial Services

**Position(s):** Paid, Internship  
**Work Location(s):** San Francisco, CA

**AppDynamics**

**Description of organization:**
AppDynamics is an exciting startup in SF (SOMA) that is funded by Kleiner Perkins, Greylock and Lightspeed and well on our way to becoming the global leader in the Application Performance Management space. We work with the internals of Java and with all frameworks from servlets to ESB's. We monitor applications in private datacenters and the public cloud. We develop very efficient high performance code to instrument revenue critical applications to expose maximum information with minimum intrusiveness and overhead. Our software is solving complex problems in environments that range from 7 to 7000+ JVM's.

**Job/Internship:**
various positions - please check out www.appdynamics.com/careers to get an idea or email heidi@appdynamics.com

**Type:** Computer Software  
**Degree(s):** Bachelor, Masters, Doctoral  
**Major(s):** Computer Science  
**Position(s):** Full-time  
**Work Location(s):** San Francisco, CA
**ASC Process Systems**

Description of organization:
ASC Process Systems is the world leader in the manufacture of custom process equipment and control systems and is the largest manufacturer of composite autoclaves in the United States. Our international customer base includes all major aerospace companies including The Boeing Company, Lockheed Martin, Northrop Grumman, BAE, and many other Fortune 500 companies. ASC has been in business for over 25 years and has experienced incredible growth. Our state-of-the-art manufacturing facility and offices are located in Valencia, California (Northern Los Angeles County) Please visit our website at www.aschome.com to read more about our company, its history, products, and services.

Job/Internship:
ASC is looking for bright and dedicated engineers to take on the design and management of equipment projects. You'll work with a great team of engineers, mechanical fabricators, and electricians to design and build autoclaves and ovens. This is a very rewarding job, but it is also extremely challenging. You'll be responsible for the design and management of million-dollar projects so this is not your typical engineering job. You'll use lots of different software packages: Inventor, Ansys, (FEA), FluidFlow, CFDesign (cfd), Compress (pressure vessel), and others. We'll train you on these packages if you haven't used them before.

BSME required. MSME preferred. We'll consider those with little to no experience, but only if you're smart.

Type: Aerospace/Defense, Other Manufacturing  
Degree(s): Bachelor, Masters  
Major(s): Mechanical Engineering  
Position(s): Full-time, Internship  
Work Location(s): United States

**Aspera Inc.**

Description of organization:
Aspera, Inc. is a fast-growing startup creating industry leading bulk data transport technologies, in software. Aspera's software products solve the fundamental problems of transferring files, directories of files, and large data sets over the Internet and private IP networks. Built on Aspera's patent-pending fasp transport technology, these produces eliminate the bottlenecks of conventional file transfer technologies and dramatically speeds file transfers, even over inherently unreliable international, satellite, and wireless links. The speed adapts to use the available bandwidth and protect other traffic in automatic mode, while allowing the user to adjust individual transfer rates and finish times. Aspera's software is deployed on six continents by major Hollywood studios, broadcasters.

Job/Internship:
Qualifications:  
- Solid understanding of software development.  
- You should be enthusiastic about learning new technologies and skills.  
- You must be capable of managing your time well and working collaboratively.  
- Experience programming in languages such as Java, Ruby, C, C++.  
- Software design and development project work, preferably including web-application as well as server-side development.  
- BA/BS, MS or better in Computer Science or a related field.  
- Excellent written and verbal communication skills.  
- Previous experience in software development in internships, summer jobs, etc. a plus!

Type: Computer Software  
Degree(s): Bachelor, Masters  
Major(s): Computer Science, Engineering  
Position(s): Part-time, Student Employment, Full-time, Internship  
Work Location(s): Emeryville, CA
**AT&T**

Description of organization:
AT&T is bringing it all together for our customers, from revolutionary smartphones to next-generation TV and broadband services and sophisticated solutions for multi-national businesses. For more than a century, we have consistently provided innovative, reliable, high-quality products and services and excellent customer care. Today, our mission is to connect people with their world, everywhere they live and work, and do it better than anyone else. We're fulfilling this vision by creating new solutions for consumers and businesses and by driving innovation in the communications and entertainment industry.

Job/Internship:

tangible business results such as traffic, revenue and engagement. BrightEdge’s S3 platform is
powered by a sophisticated big data analysis engine and is the only company capable of web-
wide, real-time measurement of content engagement across all digital channels, including search,
social and mobile. BrightEdge 8,500+ brands include 3M, Microsoft, Netflix and Nike. The
company is based in San Mateo, CA with offices in New York City, Chicago, London, Sydney,
and Tokyo

Job/Internship:
SALES @BRIGHTEDGE:
Sales helps drives our growth as a global leader in SEO technology platforms. Your career is
focused on developing the latest B2B sales skills and working with consistently innovative
technology, within performance-driven culture. The tools to succeed, coupled with continuous
opportunities to train and advance allow our Sales professionals to enjoy rewards and career
growth.

CLIENT SERVICES @BRIGHTEDGE:
The top value at BrightEdge is Customer Success - delighting and amazing our customers with
every interaction so they drive stellar SEO performance. The Client Services team are the
experts on our enterprise SEO platform and help clients leverage our technology to drive
business impact. They help Fortune 500 companies maximize their use of our platform.

Type: Computer Software, Other
Degree(s): Bachelor, Masters
Major(s): All Majors
Position(s): Full-time
Work Location(s): San Mateo, CA / Seattle, WA / Chicago, IL / New York, NY
C1 Consulting

Description of organization:
C1 Consulting is a life sciences consulting firm focused on helping our pharmaceutical and biotechnology clients successfully launch and grow their products in a rapidly changing and challenging environment. Our methods position us at the intersection of data and strategy, so that we can provide our clients with actionable insights grounded in real-world data. C1 was established in 2004 and has exhibited steady growth year over year. We have offices in Atlanta, San Francisco, and Summit (NJ).

Job/Internship:
We are looking for candidates at all levels to join our growing team! Ideal candidates for the Analyst position are recent graduates of top Masters programs, or undergraduates with one to two years of relevant work experience. Candidates for the Consultant position are typically graduates of top PhD programs with at least 2 years of relevant work experience, or MBAs. PhD graduates with less than 2 years of relevant experience are considered for the Associate Consultant position. Although many of our team members have degrees in the life sciences, engineering, or business, we hire from a wide range of disciplines including psychology, sociology, economics, statistics, and other programs with an analytic focus, as long as there is a desire to apply these skills to the healthcare industry.

Type: Biotech/Pharmaceuticals
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): All Majors
Position(s): Full-time
Work Location(s): San Francisco, CA / Atlanta, GA / New Jersey

C3 Energy

Description of organization:
C3 offers a family of software solutions that help companies to understand, optimize, and report on their energy use and greenhouse gas emissions, in order to reduce cost, risk, and environmental impact.

Job/Internship:
Software Engineer
C3 Energy is seeking highly qualified college graduates to join the C3 Engineering team. We can't tell you exactly what you will be working on, because we don't know! Every day brings something new, but suffice to say that the code you write will be used to save energy for some of the largest companies in existence, all the way down to individual consumers.

Required Skills & Experience:
• BS in Computer Science or equivalent fields, MS Preferred
• Hands-on experience with OO programming languages like Java, JavaScript, C#, etc.
• Knowledge in RMDBS and SQL is required
• Knowledge of HTML 5, XML, Ajax, Flex, Web services/RESTful is a plus
• Knowledge of BI, Analytic, Cassandra or other noSQL technology is highly desirable

Type: Computer Software
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): Mathematics, Computer Science
Position(s): Full-time
Work Location(s): Redwood City, CA
**California State Auditor**

http://www.auditor.ca.gov/bsa

**Description of organization:**
The California State Auditor is seeking motivated MPA/MPP/MBA graduates and accounting/business/finance/economics undergraduates with strong analytical and writing skills - and a desire to be challenged - to join our team.
As an entry-level Auditor Evaluator, you could be part of a team charged with investigating an allegation of corruption and/or mismanagement, or assigned to evaluate a multi-million dollar public organization and recommend program and policy improvements.
We offer a competitive salary and bonus program, an outstanding benefits package (which includes four and a half weeks of paid annual leave), and an office environment that supports a balanced lifestyle.

**Job/Internship:**
Auditor evaluators gather and document audit evidence; observe and document agency procedures and practices; interview personnel at all levels of agencies; obtain relevant program information and statistical data through manual or computer-assisted techniques; develop information through statistical sampling and quantitative analysis; prepare work papers to document work performed and to provide the basis for findings and recommendations; prepare written reports; draw conclusions and develop feasible and cost-effective recommendations; and present audit-related information at meetings and conferences with the California State Auditor and audited entities, the Legislature, and other interested parties.

**Type:** Accounting Services, Government  
**Degree(s):** Bachelor, Masters  
**Major(s):** Business Administration, Economics  
**Position(s):** Full-time

**Capgemini**

http://www.capgemini.com

**Description of organization:**
Capgemini is a global technology consulting company that employs more than 125,000 people worldwide and reported 2012 global revenues of over 13.5 billion dollars. Capgemini leverages a trademarked approach called the Collaborative Business Experience, an unrivaled ability to work together to produce the most innovative business solutions. The Collaborative Business Experience is designed to help our clients achieve better, faster, more sustainable results through our own people, a seamless access to our network of world-leading technology partners and Capgemini’s collaboration-focused methods and tools. Through commitment to mutual success and the achievement of tangible value, we help businesses implement growth strategies, leverage technology, and thrive through the power of collaboration.

**Job/Internship:**
Our consulting teams work with companies to quickly solve mission-critical problems by identifying, designing, and implementing technology enabled solutions to improve their strategies and operations. The ideal Capgemini consultant possesses the following qualities:
- Interest in working with technology to create various solutions and advancements
- Excellent communication skills
- Ability and desire to continually learn new things in a changing environment
- Analytical and problem solving way of thought
- Desire to work in a culturally diverse, team-based environment
- Overall resilient, flexible, and enthusiastic personality

Central Contra Costa Sanitary District

Description of organization:
Central Contra Costa Sanitary District (Central San) is a special district that was formed by the residents of central Contra Costa County in 1946. Our mission is to protect the health of the public and the environment. Our treatment plant in Martinez collects, treats, and disinfects an average of 45 million gallons of wastewater every day. Some treated wastewater is recycled (treated further) for irrigation use of golf courses and parks; the rest is released to Suisun Bay. Today, Central San serves more than 500,000 residents and thousands of businesses within a 144-square-mile area.
Our workforce is comprised of about 260 highly skilled men and women whose dedication and commitment enable us to provide efficient, cost-effective service for our customers.

Job/Internship:
The District is recruiting to fill 8 full-time positions from January – June 2015. $24.00/hour. 2 positions assigned to the Capital Project Division will work on one or more project design and construction teams, determining field conditions and performing engineering calculations/data analysis.
4 positions assigned to the Environmental Services Division will work on wastewater collection system and treatment plant planning projects including the areas of water recycling and process evaluation and optimization.
1 position assigned to the Plant Operations Dept. of a water pollution control facility and will receive “hands-on” engineer experience.
1 position assigned to the Environmental Laboratory to perform chemical, physical, biological, and microbiological analysis of wastewater.

Type: Government, Utilities
Degree(s): Bachelor, Masters
Major(s): Chemistry, Chemical Engineering, Chemical Biology, Integrative Biology, Microbiology, Mechanical Engineering, Civil and Environmental Engineering
Position(s): Paid, Student Employment, Full-time, Internship
Work Location(s): Martinez, CA
Change Corps
http://www.changecorps.org

**Description of organization:**
Change Corps is a paid, one-year full-immersion training program in grassroots organizing. When Change Corps organizers complete their training, they’ll know how to organize people to get change unstuck on the issues they’re passionate about and will have an opportunity to become part of a wave of new organizers who will keep pushing and prodding our country forward for years to come.

**Job/Internship:**
Change Corps is a paid, one-year full-immersion training program in grassroots organizing. Organizers receive 8 weeks of classroom training and spend most of the year gaining hands-on field experience working to make a difference on issues like women’s rights, gun violence, immigration reform, voting rights, and money in politics. Organizers will work on 3-5 campaigns in cities across the country, providing critical field support for partner groups leading the charge on these issues and many more. When Change Corps organizers complete their training, they’ll know how to organize people to get change unstuck on the issues they’re passionate about and will have an opportunity to become part of a wave of new organizers who will keep pushing and prodding our country forward for years to come.

City Hall Fellows  
San Francisco

Description of organization:  
City Hall Fellows is the only national service corps empowering smart young people to solve the problems of America’s cities. It places college graduates into city jobs where they work on significant issues related to that department or agency.

Job/Internship:  
Fellows function as full-time city employees, not as interns, consultants or observers. In contrast to traditional means for engaging new talent in civic issues – ad-hoc, part-time, short-term government internships, programs for MPA/MPP graduates and mid-career programs for local business leaders – we engage future leaders at the most pivotal point in their career development: the year after college graduation. Unlike typical leadership and internship programs, we do not simply trot out city officials to “talk at” our Fellows. Rather, our Fellows participate in a structured, year-long, quasi-academic exploration of how their city functions and why it operates that way, complete with intensive pro bono consulting projects through which Fellows practice policy evaluation/policymaking.

Type: Government  
Degree(s): Bachelor  
Major(s): All Majors  
Position(s): Paid, Fellowship, Full-time  
Work Location(s): San Francisco, CA

City Year  

http://www.cityyear.org

Description of organization:  
City Year is an education-focused nonprofit organization that works to bridge the gap in high-poverty communities between the support that students actually need and what their schools are designed and resourced to provide. In doing so, City Year is helping to increase graduation rates across the country and changing the lives of students. Founded in 1988, City Year partners with public schools in 26 cities across the United States to identify students who are at risk of not graduating on time with their peers. Our teams of young AmeriCorps leaders support students by focusing on attendance, behavior, and course performance through in-class tutoring, mentoring, and afterschool programs that keep kids in school and on track to graduate.

Job/Internship:  
City Year AmeriCorps Members:
--Provide one-on-one or small group tutoring before, during and after school to help students work through their academic challenges  
--Run afterschool clubs and service projects to give students a positive and safe activity to participate in  
--Lead energetic morning greetings for the whole school to create more encouraging learning,  
--Take attendance and call late or absent students to encourage them to come to school  
--Make positive phone calls home to fill parents and family in on the progress that's being made  
--Organize and lead activities, celebrations and projects to improve the school and community

Type: Education/Higher Education, Non-Profit and Social Services  
Degree(s): Bachelor  
Major(s): All Majors  
Position(s): Full-time  
Work Location(s): Various U.S. Locations
Civis Analytics

Description of organization:
Civis Analytics is building a data-driven world. We create technologies that empower organizations to unlock the truth hiding in their own data—transforming them into smart organizations that are ready to thrive.
While our history is rooted in political campaign targeting, we’re now partnering with intelligent organizations in healthcare, media, education, and a range of other domains. We’re also building cloud-based products to do data science better.
We are a community of engineers, data scientists, and statisticians, and are looking to add to our growing team. We are smart, fun, and a little bit weird. Does this sound like you?

Job/Internship:
TBD

Type: Computer Software
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): Computer/Physical Sciences, Engineering, Economics
Position(s): Paid, Part-time, Full-time, Internship
Work Location(s): Chicago, IL

Clean Water Action

Description of organization:
Clean Water Action is a national citizens' organization working for clean, safe and affordable water, prevention of health-threatening pollution, creation of environmentally-safe jobs and businesses, and empowerment of people to make democracy work.

Job/Internship:
Clean Water Action is hiring part time and full time Field Canvassers. Our Field Canvass Team meets at our office in Oakland and travels together to neighborhoods in the region. We organize the public to take political action, and register new members.
You will learn strategic communication and analysis skills, gain experience in grassroots lobbying, nonprofit management, political organizing, and fundraising. Paid training, professional development, and travel opportunities available.
Field canvass positions are available full time, with part time during Spring and Fall semesters, 2pm-10pm. Set your own schedule, 3-5 days/wk. This is a great way to jump start your environmental career at a top water non-profit!

Type: Non-Profit and Social Services
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): All Majors
Position(s): Paid, Part-time, Full-time, Summer Job
Work Location(s): Oakland, CA
Comcast

Description of organization:
Comcast brings together the best in media and technology. We drive innovation to create the world’s best entertainment and online experiences. As a Fortune 50 leader, we set the pace in a variety of innovative and fascinating businesses and create career opportunities across a wide range of locations and disciplines. We are at the forefront of change and move at an amazing pace, thanks to our remarkable people, who bring cutting-edge products and services to life for millions of customers every day. If you share in our passion for teamwork, our vision to revolutionize industries and our goal to lead the future in media and technology, we want you to fast-forward your career at Comcast.

Job/Internship:
The Comcast Engineering and Technology Internship Program is a summer program based at various Comcast locations throughout the greater US. The program is designed to identify high-caliber talent to build our organization with the best and the brightest students who come from a variety of sourcing channels, including on-campus career fairs, partner organizations, and direct applications. As an intern in the program, you would expect to work a 40 hour/week schedule over the course of 11 weeks throughout the summer.

**Compass Lexecon**

Description of organization:
Compass Lexecon clients include Fortune 500 corporations, major law firms, state, federal and foreign governments, as well as industry associations and public-sector organizations. The firm’s consultants have been involved in the most complicated, challenging, and highest-profile cases in the competition, finance, and energy areas. Compass Lexecon experts have a long history of assisting in securing significant victories for major clients across a wide range of industries and matters before regulatory agencies, in state and federal courts, and in jurisdictions around the world.

Job/Internship:
Compass Lexecon is seeking Analyst candidates for its Oakland office. As part of our team-oriented approach, Analysts work closely with staff economists to provide in-depth economic analysis of relevant issues in each matter. While each project presents a different set of challenges, Analysts can generally expect to perform extensive data analyses, conduct industry research, and review case evidence.

The data and research skills gained at Compass Lexecon serve as highly effective preparation for graduate studies, particularly in the fields of economics, business, law, and public policy.

Type: Other, Law/Law Related  
Degree(s): Bachelor, Masters  
Major(s): All Majors  
Position(s): Full-time, Internship  
Work Location(s): Oakland, CA / Mountain View, CA

---

**Constant Contact**

Description of organization:
Constant Contact’s mission is to fuel small businesses and nonprofit success. Everything you’ll do here—regardless of your title or department—comes back to that. We’ve grown from a start-up in an attic to more than 1,300 employees and 600,000+ customers worldwide. And we’ve expanded from offering email marketing to the first all-in-one online marketing platform designed for small organizations.

And while we are a publicly-traded global company, that doesn’t mean we act like one. From BBQs and bowling parties, to design sprints and Innovation Jams, there’s always something to keep us loose and bring us together. When we’re not working or playing hard, you’ll find our folks giving back to the community through local volunteer events and charity auctions. It’s just who we are.

Job/Internship:
We’re building our next generation of leaders. So whether you’re searching for a hands-on internship, co-op, or your first job, we’ve worked hard to make sure this is a great place to start. We are looking for the best new talent for front & back-end development (java, javascript, ruby), android & objective-c development, information security, big data & business intelligence, user experience (UX), quality engineering (QA), inside sales, and many other functional areas!

Did we mention we now have a Rotational Software Engineering Development Program for new grads? Because we do…and it’s awesome.

Type: Computer Software  
Degree(s): Bachelor  
Major(s): Computer Science  
Position(s): Paid, Internship  
Work Location(s): Waltham, MA
**Continental Automotive**

http://www.continental-corporation.com

**Description of organization:**
With sales of €32.7 billion in 2012, Continental is among the leading automotive suppliers worldwide and currently has approximately 173,000 employees in 46 countries. The Automotive Group with its three divisions Chassis & Safety (sales of approximately €7.0 billion in 2012, 34,500 employees), Powertrain (sales of approximately €6.1 billion in 2012, 31,000 employees) and Interior (sales of approximately €6.4 billion in 2012, 33,000 employees) achieved sales of approximately €19.5 billion in 2012. The Automotive Group is present in more than 170 locations worldwide.

---

**Counsyl**

http://counsyl.com

**Description of organization:**
Counsyl is a technology company that strives to give millions of men and women access to vital information about their bodies, helping them confidently make choices about their lives. The team consists of world class engineers, scientists and clinical experts as well as a renowned engineering and scientific advisory board. Counsyl integrates sophisticated technology with custom robotic automation in its accredited medical laboratory. This focus on technology has made Counsyl a leader in helping patients and doctors communicate about medical results in real time. Its products have won the Wall Street Journal’s Innovation Award for Medicine, and have been named one of Scientific American's "Top 10 World Changing Ideas."

**Job/Internship:**
Software is at the heart of Counsyl. The vast majority of our operations are powered by our own custom-built infrastructure on a Python/Django/Postgres stack, from ordering to lab processing to billing. We’re building new tools, new workflows, and new infrastructure to solve the challenging problems of a technology startup involved with not just bits, but also interconnected physical components like lab robotics and patient samples. Don’t be intimidated if you don’t have a genomics background; solving these problems fundamentally requires software solutions. We’re looking for the best and brightest software engineers — strong generalists with solid CS fundamentals and practical software engineering intuition — to help us scale up to billions of users.

**Type:** Other

**Degree(s):** Bachelor, Masters, Doctoral, Postdoc

**Major(s):** Electrical Engineering and Computer Science

**Position(s):** Full-time, Internship

**Work Location(s):** South San Francisco, CA
**Cray Inc.**

**Description of organization:** Would you like to work for the world leader in supercomputing? Cray Inc. needs outstanding people who are excited about the challenge of creating the world's most powerful supercomputing systems — people who thrive on taking technology where it has never been.

We need individuals with creativity and vision — people who are comfortable with change and who are willing to work beyond the technological boundaries that exist today.

**Job/Internship:**

Cray Inc. offers a limited number of internship positions targeted at the best and brightest students. These internships run during the summer months (3-4 months in duration) between academic sessions and will be located in one of our major locations (Seattle, WA, St Paul, MN, Chippewa Falls, WI, Austin, TX, Milpedias, CA, or at a customer site around the country).

The Cray Internship Program allows students to gain real-world work experience in their academic field. Cray interns will partner with some of the most talented and experienced professionals in the high performance computer industry who help our customers solve the most demanding, most crucial computing problems on the planet.

**Type:** Computer Hardware, Computer Software  
**Degree(s):** Bachelor, Masters, Doctoral, Postdoc  
**Major(s):** Computer Science, Electrical Engineering and Computer Science, Computational Engineering Science  
**Position(s):** Part-time, Full-time, Internship  
**Work Location(s):** St Paul, MN / Seattle, WA / Pleasanton, CA / Austin TX / Chippewa Falls, WI AND many customers sites around the country.

Work Location(s): Livermore, CA

Databricks

Description of organization:
Databricks spun out of the UC Berkeley Computer Science department in 2013. Founded by Berkeley Faculty and students, with $47 million in funding from Silicon Valley's top VCs, we are one of the fastest growing startups in the Big Data space. We are building a cloud SaaS platform to commercialize Apache Spark, the fastest growing open source Big Data software project. We are deeply committed to open source and have an exceptionally high engineering bar. We are deeply committed to the open source community we steward, regularly hosting thousands of developers at our Spark Summits, meetups, etc.
We have a uniquely Berkeley DNA, consisting of dozens of Berkeley affiliates including faculty (our CEO is a Berkeley EECS professor), PhD students, Undergraduates, Postdocs and researchers.

Job/Internship:

Software Engineer Requirements:
* Good understanding of (one or more): system design, distributed systems, database systems, cloud infrastructure, security, JVM performance optimizations
* Attitude for simple, elegant designs
* Able to pick up a new language or framework in hours

Requirements for Software Engineer - JavaScript:
* Expert knowledge of HTML, CSS, and JavaScript (both in its raw form and with common libraries)
* Experience developing highly complicated single page web apps
* Experience with data visualization a bonus

Position(s): Internship
Work Location(s): Austin, TX / Santa Monica, CA

DocSend

Description of organization:
DocSend is changing the way people communicate with documents by enabling you to know what happens after you send them. Just as Google Analytics made it possible to track and measure website traffic, we’re doing the same for documents. We make it possible to know who opens your docs, when they open them, and what they’re interested in. With this knowledge, salespeople know which prospects to follow up with first, marketers know which content is performing best, and entrepreneurs know which investors they shouldn’t spend more time with. We’re based in San Francisco and co-founded by three Stanford CS grads.

Job/Internship:
We’re looking for a motivated, brilliant full-time software engineer to join our small, venture-backed start-up set on fundamentally changing the way people communicate with documents. We’re all full-stack engineers and hope you are, too.
The ideal candidate is: awesome, willing to extend themselves to learn new technologies or programming languages, takes pride in their work, willing to commit hard work to building something exceptional, and of course able to have fun.

Type: Computer Software
Degree(s): Bachelor, Masters
Major(s): Computer Science, Electrical Engineering and Computer Science
Position(s): Full-time
Work Location(s): San Francisco, CA
**DuPont Industrial Biosciences**

Description of organization:
DuPont Industrial Biosciences comprises an unmatched portfolio of capabilities in industrial biotechnology and biobased solutions. The unique combination of agricultural, biotechnology, chemical and material science capabilities allows DuPont Industrial Biosciences to deliver cost-effective products with superior performance and sustainability aspects to a range of industries. Bringing together the expertise from Danisco, Genencor, and DuPont has yielded a unique combination of strengths in enzyme technology, materials science, and bioprocessing. We call it Powered by DuPont™ Genencor® Science. It’s what powers the innovations to help solve some of the world’s greatest challenges.

Job/Internship:
DuPont IB offers great summer internships to give students hands-on experience conducting world-class biotechnology research and development projects. As a DuPont IB intern, you’ll make a measurable contribution to a specific department, working with a multidisciplinary team of scientists. You will gain practical laboratory experience under the guidance of some of the world’s best scientists and researchers. Get an inside view into what industry is all about by participating in a Poster Session, present your research to the site in our Seminar Series, and have the ability to network and make connections during our Friday Zymes. DuPont IB interns receive a competitive hourly wage and provide their own transportation and housing during the 3-month summer internship program.

Type: Biotech/Pharmaceuticals

**E&J Gallo Winery Gallos Sales Company**

Description of organization:
Gallo Sales Company is the Northern California distributor for E&J Gallo Winery, the largest producer of wine in the world. The Winery’s annual sales exceed $1.4 billion, expanding internationally into over 97 countries. Founded in 1933 by Ernest and Julio Gallo, it is still a privately owned and operated family corporation with a commitment to excellence in every aspect of its business. The Gallo family is dedicated to both building their brands and the California wine industry. By focusing its attention on the future rather than on past success, it has been able to capitalize on opportunities despite uncertainty, risk, and great competitive odds. With the Winery’s current organizational resources, including exceptionally dedicated and talented employees, world class vineyards and winery.

Job/Internship:
Have you ever thought of working in the wine industry? Come visit with the largest winery in the world and learn more about an exciting career in sales, marketing and management. The E&J Gallo Winery is hiring for full-time entry level sales positions for our Management Development Program. Imagine having an exciting career you'll love and working for a company where you can make a difference every day.

Type: Food, Beverage and Tobacco

**Epoxy**

http://epoxy.tv

**Description of organization:**
Epoxy builds exceptional software for online video creators and viewers. Our tools help YouTubers and networks optimize their business and deepen the relationship with their audience. Our channel experiences provide viewers with new ways to connect with and experience the content they love.

Epoxy was founded by designers, engineers and entrepreneurs who are passionate about product and solving problems. Our backgrounds include Stanford, Brown, IDEO, Adobe, Mixpanel, Google/YouTube, BMW and Team Downey. Our organization is flat and takes inspiration from the best design, innovation and engineering cultures. We’re fans of design, engineering, elegant products, art, pop culture, entertainment and, generally speaking, extraordinary experiences.

**Job/Internship:**
Epoxy includes systems for collecting and analyzing data, and we are seeking an exceptional engineer with big data experience to join the team. We are aggressively building our product, and you will be an integral member of our small and focused team. Rather than a Data Scientist, we are seeking a solid product or systems engineer with significant web-scale data experience to help make sense of the bits and bytes.

Equilar, Inc.

http://www.equilar.com

Description of organization:
Based in Redwood City, California, Equilar is the market leader for benchmarking executive and director compensation. Equilar’s award-winning suite of online databases and custom research services are the first choice for companies seeking solutions to the challenges of executive compensation and corporate governance. Equilar’s clients include leading human capital consulting firms, over 800 publicly traded corporations, law firms, private equity investors and individual executives. These clients all rely on Equilar to rapidly and accurately compare individual executive and director pay packages across companies. Equilar’s research is regularly featured in The Wall Street Journal, CNBC, The New York Times and other leading media publications.

Job/Internship:
OVERVIEW
Each year Equilar hires 8-12 talented, analytical, and motivated graduates to join our team and embark on their careers at Equilar. We are now recruiting for entry-level hires to start full-time in 2015. To be eligible, you must have completed a college degree (May/June 2015 graduates are eligible), have maintained a solid track record of success, and be driven to start a career in business.

You join Equilar as an Analyst on our Research team. As a part of our Research Rotation Program, you are also automatically started on one of three career development paths at the company:

- Research Management Track
- Product Development Track
- Client Relations Track

For more information, go to: http://www.equilar.com/career-development/research-rotation-program.

Major(s): All Majors
Position(s): Paid, Full-time, Internship
Work Location(s): Redwood City, CA / Tampa, FL / Ashburn, VA
**Everlaw, Inc**

http://www.everlaw.com

**Description of organization:**
We're a young startup with a real business model and a bright future. We provide document analysis, review, and discovery tools to law firms who need to wade through millions of pages of evidence to find that one needle in the haystack (or sometimes the smoking gun!).

We host terabytes of data. We're venture funded and profitable. We co-lease space in downtown Berkeley (two blocks from the BART) with another startup.

We're also big nerds. Our CEO has a Ph.D. in Computer Science from UC Berkeley. We compete with better technology combined with a deeper understanding of our users’ needs.

**Job/Internship:**

**Marketing Coordinator:**
You'll help develop our company's marketing strategy and demand generation programs, including outreach (blogs, conferences, webinars), advertising (online and offline), social media, analytics, and more.

**Sales Development Associate:**
You'll help add more ideal customers to our sales pipeline by researching new prospects, reaching out to them to learn about and solve their problems, and scheduling follow-up meetings and demos for qualified leads with the sales team. This is a customer discovery role, not a traditional sales role, and it is a great opportunity to learn business and sales fundamentals.

**Both:**
Since we’re a small, flexible team, you'll also have the opportunity shape product development and design your own projects to help grow our company.

**Type:** Computer Software, Law/Law Related  
**Degree(s):** Bachelor, Masters  
**Major(s):** All Majors  
**Position(s):** Full-time, Summer Job, Internship  
**Work Location(s):** Downtown Berkeley, CA

**FactSet Research System**

http://www.factset.com/careers

**Description of organization:**
FactSet is a financial data and software company headquartered in Norwalk, Connecticut with offices in 35 locations worldwide. On May 31, 2014, annual revenues totaled $932 million and employee headcount passed 6,300. FactSet has been publicly traded on the New York Stock Exchange under the symbol FDS since 1996 and on NASDAQ under the same symbol since 2009.

Once again this year, FactSet is listed as one of FORTUNE’s “100 Best Places to Work” and one of Forbes’ “200 Best Small Companies.”

**Job/Internship:**

Consultants are the essential link between investment professionals and FactSet’s powerful software. Combining a thorough understanding of finance and technology with specific expertise in FactSet software, consultants help clients streamline the research and analysis process.

Consultants offer an unparalleled level of service along with insight into the intricacies and functionality of FactSet applications. Consultants assist clients in a variety of ways:

- By supporting FactSet applications and creating custom FactSet models, screens, and automation routes
- By training clients in their offices and at training seminars
- By providing creative solutions through expert telephone consultation and on-site consultation

**Type:** Financial Services  
**Degree(s):** Bachelor  
**Major(s):** Business Administration, Economics  
**Position(s):** Full-time  
**Work Location(s):** San Francisco, CA
FactSet Research Systems Inc.

Description of organization:
FactSet is an innovative software company that provides integrated financial information and analytics to investment professionals around the world. The company, which is ranked as one of FORTUNE’s 100 Best Companies to Work For, is looking for talented software engineers who are seeking challenging technical positions in a collaborative work environment. Engineers work closely with product developers to create and enhance FactSet's comprehensive suite of financial applications. Our engineers write code in C++, C#, and HTML/JavaScript to develop and refine the software that industry professionals use to solve complex financial problems. Headquartered in Norwalk, CT, FactSet is seeking engineers to work in our Norwalk, Boston, NY, Chicago, Austin and San Francisco offices.

Job/Internship:
FactSet Software Engineers are self-motivated, articulate, highly-skilled professionals. They design and implement applications, databases, and systems, having responsibility for all phases of development. Engineers work closely with other departments to ensure that FactSet’s products and technologies are extremely responsive to the changing needs of the investment community. Our hands-off management style encourages developers to take initiative to complete projects, manage multiple tasks, and set their own day-to-day priorities. Following training, the Engineer has immediate opportunities for creative software development. Whether it’s enhancing existing systems or creating groundbreaking new facets to the service, FactSet engineers continually contribute to the success of the company.

Federal Deposit Insurance Corporation Administration (FDIC)

Description of organization:
The Federal Deposit Insurance Corporation is widely recognized as a premier regulatory agency and was recently named one of the Federal Government’s “Best Place to Work.” An independent agency of the Federal government, the FDIC was created in 1933 in response to the thousands of bank failures that occurred in the 1920s and early 1930s. FDIC’s mission is to maintain stability and public confidence in the Nation’s financial system by insuring deposits, examining and supervising financial institutions, and managing receivership.

FDIC’s Vision is to recognize leader in promoting sound public policies, addressing risks in the Nation’s financial system, and carrying out our insurance, supervisory and receivership management responsibilities.

Job/Internship:
This is an entry-level trainee position with the Federal Deposit Insurance Corporation, one of the nation's premier bank regulatory agencies. Successful applicants are placed in a 3 - 4 year training program leading to professional certification as a commissioned bank examiner or resolutions and receivership specialist.

Type: Government
Degree(s): Bachelor, Masters

**Good Eggs**

Description of organization:
Working with local producers, Good Eggs is creating marketplaces to support the independent local farms and food businesses who enrich their communities, use sustainable practices, treat employees fairly, and make their food with care. We're honing our model in the San Francisco Bay Area for a nationwide roll-out. Our teams in Brooklyn, Los Angeles and New Orleans are expanding our marketplaces in each of their cities. In each of our offices, you'll find a unique combination of a bustling local food hub and a focused, beautiful workspace. Good Eggs offers an opportunity to use your energy, creativity and enthusiasm to grow and sustain local food systems worldwide. Jumpstart your career with an internship at a fast-growing startup that is working hard to make the world a better place!

Job/Internship:
Ideal Candidates Will Have:
- A desire to use their talents to make the world a better place
- Full-stack web application development experience in any of Ruby, Python, PHP, Java, JavaScript
- Demonstrable interest in learning and adopting new tools and techniques
Why Work for Good Eggs!
- Deepen your knowledge of locally produced foods by engaging with our producer and eater community
- Locally-sourced team lunches made by our on-site chef, regular happy hours and employee discount
- Most of all -- Good Eggs offers an opportunity to use your energy, creativity and enthusiasm to participate in building a better food system. We're looking for folks who are passionate about our mission, talented and driven to change the world. If that sounds like you, get in touch!

**Green Corps**

**Description of organization:**
The mission of Green Corps is to train organizers, provide field support for today’s critical environmental campaigns, and graduate activists who possess the skills, temperament, and commitment to fight and win tomorrow’s environmental battles.

**Why Did We Start?**
Following Earth Day 1990, a wave of environmentally minded college graduates left academia looking for a way to put their values to work. As is true today, there was no shortage of interest and desire to act on university campuses across the country, producing graduates who were passionate and ready to contribute to the environmental movement but who were faced with an obstacle: How do you find a position with one of these environmental organizations with minimal experience? That's where our training program comes in!

**Job/Internship:**
Green Corps 2015-2016 Field School for Environmental Organizing
Green Corps is looking for college graduates who are ready to take on the biggest environmental challenges of our day. In Green Corps’ year-long paid program, you’ll get intensive training in the skills you’ll need to make a difference in the world. You’ll get hands-on experience, and we’ll help you find a career with one of the nation’s leading environmental and social change groups.
In your year with Green Corps you’ll get great training with some of the most experienced organizers in the field, you’ll get amazing experience working on environmental issues across the country, and we'll help launch your career in protecting the environment.

Familiarity with NoSQL databases and Lucene/Solr a plus
A desire to build an engaging consumer experience
B.S., M.S., or Ph.D. in Computer Science or equivalent
5+ years experience

Full-Stack Engineer
Top-notch software engineering talent
Self-directed, independent and has experience owning complete features/products
Amazing ability to get stuff done
Proficiency in web application programming (OOP, Java/C++, LAMP)

Type: Other
Degree(s): Bachelor, Masters, Doctoral
Major(s): All Majors, Computer/Physical Sciences, Engineering
Position(s): Full-time, Internship
Work Location(s): United States
Description of organization:
We’ve been bringing people together since 2004, building apps with hundreds of millions of users. Now our experience and momentum have us primed to create the next billion-user idea. We have the luxury to experiment with the latest technology and ideas without being tied to the launch of a particular product. We’re taking multiple shots, iterating as we go. We love the apps we’ve already created (starting with our flagship, Tagged), but we’re just as excited to innovate, experiment and use our skills to explore the endless possibilities that exist in social technology. After all, isn’t that how you grow?

Job/Internship:
TBD

Type: Computer Software
Degree(s): Bachelor, Masters
Major(s): Mathematics, Computer Science, Electrical Engineering and Computer Science
Position(s): Paid, Summer Job, Internship
Work Location(s): San Francisco, CA

Description of organization:
Industrial Automation Group is a controls system integrator that serves the Food and Beverage industry. Today’s food and beverage companies need more than just someone to write ladder logic, they need partners with industry specific expertise and proven experience. Our dozens of automation professionals apply Process, Control, Safety, Information and Control Panel knowledge to food and beverage clients large and small. From Fortune 500’s to small family owned food companies, our local successes have led us to projects globally.

Job/Internship:
Industrial Automation Group will teach you to design control system networks and control panels, develop PLC and HMI code, develop control system documentation (IO list, scope of work statements, conduit schedules, routing tables, FAT and SAT plans) perform FATs, commissioning and SATs, maintain and develop customer relationships and maintain project labor budgets and deadlines. You need to be willing to be paid well, work in an office environment and at the job site, work overtime as needed, be a dependable, cooperative team player who is enthusiastic, has a can do attitude and can meet new people easily. Additionally, controls engineers develop, train and supervise controls engineer interns who are learning all of the above skills.

IXL Learning, Inc.

Description of organization:
IXL Learning is an educational technology company like no other. We develop dramatically innovative, first-of-their-kind products used by millions of learners, from children to adults. Our IXL product (located at IXL.com) is the world's most popular subscription-based learning site for K-12. Our other products include Quia Web, the original 'create-your-own' website for teachers, and Quia Books, the leading online platform for world languages courses.

Job/Internship:
We're seeking software engineers who have a passion for technology and education to help us add new features to our extremely successful educational products and build new, innovative products. We are constantly adding new features for our over 5 million paid, subscribed users, helping students and teachers in all 50 states and over 190 countries. As a Software Engineer, you'll build the back-end wiring, application logic, and UI that drive the site. You will find and use the best technologies to add features to our products. You'll be involved in all aspects of the development process – including design, coding, testing, debugging, and tuning. In addition to working with your fellow engineers, you'll collaborate with other teams to design amazing products that meet the needs of our use.

**Juniper Networks, Inc.**

http://www.juniper.net

**Description of organization:**
At Juniper Networks, we believe the network is the single greatest vehicle for knowledge, understanding, and human advancement that the world has ever known. Now more than ever, the world relies on high performance networks. And now more than ever, the world needs network innovation to unleash our full potential.

The network plays a central role in addressing the critical challenges we face as a global community. Consider the healthcare industry, where the network is the foundation for new models of mobile affordable care for underserved communities. At the core, the network has become a platform - one that transforms how we interact with our government institutions, conduct business on a daily basis, and connect with our family and friends.

Jut, Inc.

Description of organization:
Jut is a Big Data driven solution targeted at the $20B IT operations market. After an initial seed round of funding, the company just received a $20M round of venture capital to address this market.

Our solution is expressly architected around Big Data to address problems at the next level of scale. What's really cool about this is that it's not your run-of-the-mill product development: we're heavily open source and community driven. The team here isn't about re-inventing the wheel. We use open source and care about bringing others into the fold of what we're doing.

Another way to think about this is bringing web-scale technologies like those used in Facebook and Google to bear on IT operations problems that hundreds of thousands of enterprises around the world face.

Job/Internship:
Software Engineer — New Grad
We're looking for bright and motivated software developers in the early stages of their careers to join our growing team
You should have:
Demonstrable programming competence in a variety of languages, from Javascript to C/C++.
A solid computer science foundation, including data structures, algorithms, operating systems, and databases.
The enthusiasm and ability to hit the ground running, start contributing from Day 1, and continue to learn quickly on the job.
A good sense of the architecture of the web and HTTP / TCP networking fundamentals.
A BA/BS in computer science or a closely related field.

The role requires:
*Strong academic record in economics, finance, or accounting  
*Solid analytical and critical-thinking abilities  
*Effective oral and written communication skills  
*Excellent interpersonal skills  
*Traits such as being pro-active, self-motivated, and dependable

**Type:** Professional, Technical, and Administrative Services, Law/Law Related  
**Degree(s):** Bachelor  
**Major(s):** All Majors  
**Position(s):** Full-time  
**Work Location(s):** Oakland, CA / Mountain View, CA
LiveRamp

Description of organization:
At LiveRamp we pride ourselves on three core things: the quality and humility of our people, our aspiration for constant learning and improvement, and the caliber of our work product. We happen to work on mind-bendingly fun massive data systems and analysis problems.

Job/Internship:
New Grad - Software Engineer
Can't be tied down to a single specialty? This is the job for you. It's hard to say what tomorrow's challenge will be, but you'll be happy to hack away at it, whether it's a Ruby on Rails web UI, a distributed analysis Hadoop application in Java, or something completely new.
Internship - Software Engineer
Get ready for the best learning experience of your life. You will receive the same orientation training as our full-time engineers, you will be matched with an individual mentor, and you will be committing production code by the end of your first week.
TERM - Tech Entrance Rotation and Mentorship
LiveRamp's TERM Program is a great way for recent grads and people early in their careers to pivot into a technical role.

Type: Computer Software
Degree(s): Bachelor, Masters
Major(s): Mathematics, Applied Mathematics, Computer Science Minor, Computer Science
Position(s): Paid, Full-time, Internship
Work Location(s): San Francisco, CA

Logitech

Description of organization:
Logitech is a world leader in products that connect people in a natural, intuitive way to the digital experiences they care about. We develop our products with a powerful blend of artistic design, surprising science, and innovation driven by consumer insight. Our consumer products are designed for popular computing devices--PCs and Macs, tablets and smartphones.

Job/Internship:
Still in school and looking to jumpstart your career? If you're someone who likes to move fast, push boundaries and try new ideas...we want to meet you. Our internships aren't about making photocopies or getting coffee -- they're about rolling up your sleeves, sharing ideas, collaborating with employees and working on real, meaningful projects. Search our current intern opportunities to see how your innovative and unique viewpoint can make an impact at Logitech.

---

**Materia Inc.**

**Description of organization:**
Materia, Inc. is a technology solution provider to the energy, transportation, chemical and pharmaceutical sectors. Materia was founded in 1998 to commercialize the Grubbs Catalyst™ technology, for which Caltech professor Robert Grubbs won the Nobel Prize in 2005. The Company’s proprietary catalysts create advanced polymeric materials that are stronger, lighter and more easily processed than competing materials, extending today’s technology frontier. Materia provides both off-the-shelf solutions and customized formulation development for new products, which are designed, tested, and manufactured at its state-of-the-art facilities. The Company also provides its catalyst technology to other companies to enable unique chemical transformations, creating more cost-competitive processes and novel products.

**Job/Internship:**
Materia has several exciting opportunities with our engineering department and our chemistry departments.

**Type:** Chemicals, Engineering
**Degree(s):** Bachelor, Masters, Doctoral
**Major(s):** Chemistry, Chemical Engineering, Mechanical Engineering, Materials Science and Engineering, Industrial Engineering and Operations Research, Applied Science and Technology

Matsui Center for Politics and Public Service

http://igs.berkeley.edu/matsui-center

Description of organization:
The Matsui Center engages Cal students in public life through internships, public events, and the presence of distinguished campus visitors.

Job/Internship:
The Matsui Local Government Fellowship offers students the opportunity to get firsthand municipal experience in California's political and policy making communities. The Fellowship allows undergraduates to spend 8 weeks during the summer interning in a branch of local government of the student's preference anywhere in California. The fellowship comes with a $2,000 stipend.
The John Gardner Fellowship selects 3 Fellows from among the graduating class and provides each a $30,000 stipend to work in the governmental or nonprofit organization that most closely fits their public sector interests. Fellows are matched with a senior-level mentor during their 10-month fellowship. The goal of the Fellowship is to encourage UC Berkeley’s best students to pursue a career in public service

Type: Government
Degree(s): Bachelor
Major(s): All Majors
Position(s): Paid, Fellowship, Full-time, Summer Job, Internship
Work Location(s): California

Maxim Integrated

http://www.maximintegrated.com

Description of organization:
Maxim Integrated is a highly successful, $2.4 billion company. With offices and manufacturing sites around the world, we design award-winning semiconductors that make the world more integrated. We also know that it’s our people who make us a great company. So we reward bold thinking, teamwork, personal growth, and community involvement. Want to make a difference and be challenged every day? Join us at Maxim Integrated. With analog integration, the possibilities are endless.

Job/Internship:
Maxim's Launch Program offers graduates and new talent within the industry the opportunity to gain hands-on professional experience within an innovative, global company. Maxim hosts a number of opportunities for Engineering students seeking full-time and internship positions in the semiconductor industry.
Job Requirements/Qualifications: All of our Engineering positions require a BSEE, MSEE or Ph.D. Please view specific requirements/qualifications by individual job posting(s) at our Careers site.
Application Instructions: Please apply at our Careers site: https://maximic.ats.hrsmart.com/cgi-bin/a/searchjobs.cgi

Work Location(s): San Jose, CA / Dallas, TX / Chandler, AZ / Beaverton, OR / Hillsboro, OR / Austin, TX / Chelmsford, MA / Colorado Springs, CO
Meraki Engineering

Description of organization:
Meraki is a networking systems start-up located in the hip, sunny Mission District of San Francisco. Our unique cloud-hosted controller architecture provides centralized management and security through an intuitive web interface, eliminating high costs and complexity associated with traditional networking systems.
We’re a fun company to work for, so long as you don’t mind free food + beer, flexible hours, wall space occupied by Chewbacca and unicorns, Nyan Cat greeting on the Intranet, and most importantly: a small dev team.
We’re hiring for teams working on user interface, distributed back-end systems, and device drivers.

Job/Internship:
We are currently hiring full-time & internship roles for teams working on distributed back-end systems, device drivers, and our web application. Cisco Meraki is comprised of small teams (ranging from 2 - 5 people) that work on Front-end, Back-end, Mobile and Firmware; however, our engineers hack the full stack. As an software engineer at Cisco Meraki, you get to have an impact along with the opportunities to move between teams and learn new things constantly.

Type: Engineering
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): Mathematics, Computer Science, Computational Engineering Science
Position(s): Full-time
Work Location(s): San Francisco, CA

Microsoft

Description of organization:
Microsoft is the worldwide leader in software, services and solutions that help people and businesses realize their full potential. We're motivated and inspired every day by how our customers use our software to find creative solutions to business problems, develop breakthrough ideas, and stay connected to what's most important to them.
We run our business in much the same way. Our employees come as they are and do what they love. Imagine the opportunities you’ll have in a company with 100,000 employees in more than 100 countries, working on hundreds of products—spanning games, phones, developer tools, business solutions and operating systems. We work hard, but we value work/life balance, and each of us defines what that means to us.

Job/Internship:
Software engineers at Microsoft are passionate about building technologies that make the world a better place. At Microsoft, you will collaborate with a team of programming experts to solve problems and build some of the world’s most advanced services and devices. Your efforts on the design, development, and testing of next-generation applications will have an impact on millions of people.
You are the link between abstract concepts and delivered solutions. Understanding the consumer, solving problems, and building applications that will impact millions of people. SWEs dive deep into code and work as part of a team of programming experts who solve problems and build powerful new tools. See jobs # 870159 & 870160 for full descriptions of our FT and IN roles.

Type: Computer Hardware, Computer Software, Electronics and Misc. Tech, Engineering
Degree(s): Bachelor, Masters, Doctoral
Major(s): Computer Science Minor, Computer Science, Cognitive Science, Information & Data Science, Electrical Engineering and Computer Science, Computational Engineering Science
Position(s): Full-time, Internship
Work Location(s): Redmond, WA
**Motorola Mobility**

http://www.motorolacareers.com/

**Description of organization:**
At Motorola, we have a long tradition of innovation. From the invention of the DynaTAC in 1984 to the release of Moto X, Moto G, Moto E and the soon to be released Moto 360 – each disruptive in their respective segments; we’re changing the way the world defines mobile technology. With the goal to sell 100 million phones each year, we’re ready to be the number one smartphone provider in the world by 2015. It’s ambitious, we know, but we’re up for the challenge.

To get there, we’re doing things differently. Here, you won’t find hierarchy or bureaucracy. Our people work in supportive, dynamic teams where new ideas are always welcome and things get done. When you join us, you’ll collaborate with global colleagues who will inspire and motivate you.

**Job/Internship:**

**Scope of Responsibilities:**
This internship will expose you to the design and development of integrated parts and assemblies in our portable electronics. You will collaborate with our industrial design and electrical engineering teams to create new concepts for electronics packaging and model these concepts in Pro/E.

Using a variety of rapid prototyping methods, you'll iterate, optimize, and validate these concepts. You will work with external suppliers and our talented supply chain team on preparing your parts for mass production, selecting the best vendors, and validating the production of your parts. You will also author mechanical specifications, develop assembly fixtures, and stress our designs through a variety of reliability testing.

**Type:** Telecommunications

**Degree(s):** Bachelor, Masters

**Major(s):** Mechanical Engineering, Electrical Engineering and Computer Science, Computational Engineering Science

**Position(s):** Internship

**Work Location(s):** Sunnyvale, CA

---

**Mu Sigma Inc**

http://www.mu-sigma.com

**Description of organization:**
We are a Decision Sciences and Big Data Analytics company, helping large enterprises take a fundamentally new approach to data-driven decision making, one designed to match the incredible pace of change in business. We call it a new art of problem-solving, and it’s built on the principles of learning over knowing, extreme experimentation, and an interdisciplinary model for solving business problems. The Mu Sigma team of more than 3,500 Decision Scientists currently serves 140 of the Fortune 500 as clients.

**Job/Internship:**

**Responsibilities:**
At Mu Sigma you’ll often hear the phrase “Learning over Knowing.” It’s one of our guiding principles, and as such, we expect every Mu Sigman to demonstrate passion for learning. Our work will throw a variety of concepts at you, ranging from the chemical backings of pharmaceutical drugs to the vast global supply chains of leading retailers. We help firms improve their decision making, and to do that, we must know them better than they know themselves. We aren’t just an analytics firm; we’re a Decision Sciences firm.

**Type:** Other

**Degree(s):** Bachelor, Masters

**Major(s):** All Majors

**Position(s):** Full-time

**Work Location(s):** United States and India
Description of organization:
Ames Research Center (Silicon Valley) enables exploration through selected development, innovative technologies, and inter-disciplinary scientific discovery. Ames provides NASA with advancements in:
- Entry Systems
- Supercomputing
- Next Gen Air Transportation
- Airborne Science
- Low-cost Missions
- Biology & Astrobiology
- Exoplanets
- Autonomy & Robotics
- Lunar Science
- Human Factors

**Northwestern Mutual**

http://www.nminternships.com

**Description of organization:**
Northwestern Mutual is a Fortune 500 company with $1.4 trillion worth of life insurance protection in force and over $64 billion in assets under management. As a company, we help our policyowners and clients achieve financial security. Through a needs-based process, Northwestern Mutual works with clients to determine their financial security needs and then address those needs using a wide range of products and services. It is our goal is to develop life-long relationships with clients founded on sound guidance and expert solutions, backed by the company’s exceptional financial strength and the promise we make to be there for policyowners when their financial security is put to the test. As a mutual company with no shareholders, Northwestern Mutual focuses solely and directly on its clients.

**Job/Internship:**
Interns with Northwestern Mutual have the same opportunities to build their careers as representatives with full-time contracts. Supported by our network of specialists, training programs and mentoring opportunities, interns have access to the resources, products and assistance they need to help their clients and build their practices.

Like Financial Representatives, interns strive to understand their clients’ goals and visions in order to uncover financial solutions that put them on a path to success. Financial Representative interns are in business for themselves – but they're not alone to uncover financial solutions that put them on a path to success.

**Nutanix**

Description of organization:
Nutanix is bringing the highly scalable, economic datacenter infrastructure of the largest internet companies (such as Amazon’s EC2) to the enterprise. Based on distributed systems concepts employed in core infrastructure at Google, our converged virtualization offering can scale to manage petabytes of data while running thousands of virtual machines. We disrupted the multi-billion dollar storage industry – eliminating the need for network and SAN storage. Now we are building an uncompromisingly simple virtual computing platform that brings the public and private cloud together in a hypervisor and hardware agnostic fashion.

Job/Internship:
You will gain exposure to multiple Nutanix software development roles according to your skill sets and interests. Some potential roles include: working on the core data path, storage and filesystems development, distributed systems, infrastructure and platform/hardware deployment, data protection and replication, Linux kernel development, development of the API and analytics platform, and Web and front-end UI/UX development. Our Software Engineers have a strong command of data structures and algorithms, and can solve complex computer science problems using the latest technologies and techniques. We also have an intense focus on automation and product quality.

Type: Computer Software, Engineering  
Degree(s): Bachelor, Masters, Doctoral, Postdoc  
Major(s): Computer Science, Information & Data Science  
Position(s): Paid, Full-time, Summer Job, Internship  
Work Location(s): United States

onefinestay

http://www.onefinestay.com

Description of organization:
Here at onefinestay we are redefining the way people experience their city. It’s called the unhotel - you get to live like a local in some of the most beautiful homes in London and New York. We give people the chance to stay in someone else’s home for a few days and nights, see what they’d see and, if they like, do what they’d do (thanks to the handy iPhone we provide for the duration of the stay with our own onefinestay app).

Job/Internship:
Do you want to learn the ins and outs of a growing startup? Do you want to try your hand at business development, operations, client relations and strategy? If you’re a go-getting jack-of-all-trades who’ll stop at nothing to get the task done, then you're in luck: onefinestay is hiring the Wolf, an operations genius to join a fast-growing team. We’re a cool, VC-funded startup with offices in four cities: London, New York, Paris, and now Los Angeles. And as a recent addition, our LA team is small, so you'll have the opportunity to be involved in every part of the business, from sourcing new home locations and meeting guests, to optimizing processes and analyzing data to offer insight to the business.

PCTEST Engineering Laboratory
Regulatory Compliance, SAR/HAC Testing

http://www.pctestlab.com

Description of organization:
Field: Have talent and looking for a fast-paced environment to apply a wide variety of problem solving skills? Want to be part of an amazing biomedical engineering RF safety team to evaluate designs of wireless products? The Wireless industry has been booming since the advent of the smartphone. Come stop by our booth!
Bachelor's in Engineering a requirement. 3.4 GPA or higher preferred.
BME majors welcome! Programming skills a plus.
Level 1: Early AM Shift with rotational weekends with paid OT
Level 2: Evening Shift (120% pay differential)

Job/Internship:
Enter-Level Biomedical Engineer
Regulatory Compliance

Type: Telecommunications, Engineering
Degree(s): Bachelor, Masters
Major(s): Engineering
Position(s): Full-time
Work Location(s): Columbia, MD
**Peace Corps (San Francisco Regional Office)**

**West Coast Regional Office**

http://www.peacecorps.gov

**Description of organization:**
Peace Corps service is a life-defining leadership experience with a mission of promoting world peace and friendship. Since 1961, the Peace Corps has shared with the world America's most precious resource – its people. Peace Corps Volunteers currently serve in more than 60 countries in Africa, Asia, the Caribbean, Central and South America, Europe, the Pacific Islands, and the Middle East.  

The many benefits of Peace Corps service include:
- No fee to participate
- Travel to and from country of service
- Monthly living & housing allowance
- Language

**Job/Internship:**
Volunteers serve in the Peace Corps for 27 months. Every volunteer starts out their service with three months of intensive training. During training Volunteers learn the local language(s) and customs, technical skills, and safety and security information. After training volunteers live in their community or site for two years. Some volunteers live in small villages and others live in large cities. Volunteers continue to participate in technical and security trainings throughout service.

All volunteers are assigned to one of six sectors: Health, Education, Environment, Agriculture, Business, or Community Development.

**Type:** Non-Profit and Social Services  
**Degree(s):** Bachelor, Masters  
**Major(s):** All Majors  
**Position(s):** Full-time  
**Work Location(s):** Worldwide

---

**Piazza**

https://piazza.com

**Description of organization:**
Piazza is an online Q&A platform that hundreds of thousands of students at all the top universities are using. Professors and students at MIT, Stanford, Princeton, Berkeley and Harvard were the first to adopt it when we launched in 2011. Piazza users spend an average of 2-3 hours a night on the site. Piazza is truly changing the way students learn.

**Job/Internship:**
We're looking for successful people who are looking not only to succeed, but to do something important. We're looking for talented people who believe that education can be more meaningful, more collaborative, and more democratic. In a word: better. We're looking for people who get really excited by products that fit their function beautifully, spread by word of mouth because they're sweet, and engage their users for hours at a time. We're looking for people who love to challenge themselves: to move faster; to code cleaner; to take leadership roles; to make big decisions. We're looking for people who love our product. We're fortunate that thousands of talented people use Piazza every day and want to improve it. It would be great if you felt that way.

**Type:** Computer Software, Education/Higher Education, Other

Public Allies Silicon Valley/San Francisco

http://www.publicallies.org

Description of organization:
Public Allies advances diverse young leaders to strengthen communities, nonprofits and civic participation. Program participants receive valuable community, leadership, and work experience through a paid ten-month apprenticeship at a local nonprofit, professional development and leadership training, and team service projects.

Job/Internship:
In our 10-month program you will work full time for a nonprofit organization addressing critical community issues, and develop your own leadership skills through regular trainings and self-reflection tools. As an Ally you might develop curriculum for an after school program for youth, create outreach materials for an organization offering services to runaway teens, manage pathways for parent engagement in college preparation programs, develop a plan of action for coordinating a community-wide health fair, recruit and manage volunteers for a food bank, or pilot a forum for cross-cultural dialogue in your neighborhood. Along with gaining experience and professional development at your nonprofit placement, you’ll also gain valuable leadership skills and receive career coaching.

Type: Non-Profit and Social Services
Degree(s): Bachelor
Major(s): All Majors
Position(s): Paid, Full-time
Work Location(s): Bay Area Non-Profit Organizations

Pure Storage

http://www.purestorage.com

Description of organization:
Pure Storage is a fast growing, pre-IPO company in Silicon Valley, whose world-class engineers are disrupting a $60B market for enterprise storage with a modern all-flash storage array. We are a bunch of tech nerds who bleed Pure Storage orange. We are looking for university grads and interns in search of “hands on” experience learning about and finding simple solutions to complex problems alongside our world-class engineering team. With rocket-like growth and market leadership earning us a $3B valuation from the investors who have provided our $470M in funding – we are reinventing an industry… and we want you to help!

Job/Internship:
As a software engineer, you’ll work on our core product (Performance, Data Reduction, Kernel, Manageability, Replication, Development Test Tools) and solve problems which requires research, investigation and development.
Big and small problems to work in C++11, Python, Java, Javascript
Finding duplicate data, reclaiming overwritten space in petabytes of storage
Efficient replication across wide-area networks
Analytics for health data coming from tens of thousands of customer storage arrays
Understanding how applications use flash and how to optimize the whole stack (from application to SSD)
Making code scale to 32 core or more
Simple, yet powerful user interface
Sharp tools which allow us to ship new features quickly
Extensive automated testing pre-check-in and post-check-in

Type: Computer Hardware, Computer Software, Engineering
Degree(s): Bachelor, Masters, Doctoral
Major(s): Mathematics, Computer Science Minor, Computer Science, Electrical Engineering and Computer Science
Position(s): Full-time, Internship
Work Location(s): Mountain View, CA
Quixey

We do everything we can to help you do your best work:

- Three healthy catered meals a day, including Vegetarian and Kosher meals
- Fridges stocked with high-quality food and drinks
- Onsite Yoga, Meditation, free Gym Membership and fully paid Health Benefits for employees and their dependents
- Company sponsored internal hackathons during normal business hours
- A fun, creative and inspiring work environment

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex or national origin.

Please Note: Principals only please. Agency resumes are not accepted unless assigned by the Director People Operations and Talent Acquisition at Quixey and will be considered unsolicited resumes that are not subject to placement fees.

Job/Internship:

About Quixey

Quixey is The Search Engine for Apps. Imagine a world where you can find the perfect app that does exactly what you want, when you want it – we’re building that world. Quixey’s proprietary Functional SearchTM is intuitive; users describe what they want to do, and Quixey finds apps that do it. Quixey powers app search for major manufacturers, carriers, search engines and web-sites across the globe. We’re well funded, backed by world-class investors and are on track to power a billion queries per month. We’re looking for passionate people who can make big things happen and have fun doing it. If you are that person, then we want to meet you!

Type: Computer Software
Degree(s): Bachelor, Masters, Doctoral, Postdoc

Rally Health

With offices in San Francisco and Washington, D.C., Rally Health thrives at the intersection of ground-breaking technology and improving healthcare outcomes through patient engagement. An executive team that has been working together to transform the industry since 2010, a majority of our team brings experience from outside the healthcare industry; our employees challenge the status quo by integrating data driven solutions for patient engagement. Leveraging our combined experience to develop a truly consumer-centric digital health platform, Rally meets the user where they are today to engage every user to rally for better health today, tomorrow and every day. We’re hiring!

Job/Internship:

Be a part of our vision, to inspire healthier people everyday by putting health management in people's own hands! Build features that align to our vision, solve hard technical problems and learn from others. We are working on interesting technical challenges in the areas of web performance, server scalability, online data architecture, analytics, personalization and recommendations. Our current tech stack includes Scala using the Lift and Play frameworks, MongoDB, RabbitMQ and Elasticsearch. Join an elite team of engineers and have the autonomy to architect full solutions that scale to fit our user growth.

We offer paid internships to new grads and any students who will graduate with a bachelor’s, master’s, or PhD degree within two years. Positions are available both in DC and SF.

Type: Computer Software, Health Products and Services, Engineering
Degree(s): Bachelor, Masters, Doctoral
Major(s): Computer Science
Position(s): Part-time, Student Employment, Full-time, Summer Job, Internship
Work Location(s): San Francisco, CA / Washington, DC
**Raybeam, Inc.**

http://raybeam.com

**Description of organization:**
Raybeam Inc. is a dynamic technology consulting company focused on strategic consulting, business intelligence, and online/database marketing. We have offices near Boston and in Silicon Valley and support a strong list of clients including Google, Facebook, Microsoft, eBay, AOL/Time Warner, and Hilton Worldwide. We seek a flexible, well-rounded technologist with maturity and business savvy to join us. We design and develop systems using a variety of tools and platforms. We work in small teams, own the projects that we work on, and have direct input into the business decisions of our clients.

**Job/Internship:**
What we’d like to see in you:
- Breadth of knowledge - We move fast on small teams with a variety of technologies.
- Excellent communication skills - Be able to explain what you are doing and why to your teammates and to the client.
- Adaptability – You need to work with new technologies or deal with challenging situations.
- Problem Solving – You need to solve problems under pressure and adapt to new situations.

Experience or proficiency in several of the following is expected:
- Database Management Systems—e.g. Oracle, MS SQL, mySQL
- Operating Systems – e.g. Linux, Windows and MacOS
- Scripting languages—e.g. Ruby, Python
- Compiled languages—e.g. C#, Java, C

**Type:** Computer Software, Engineering

**Position(s):** Full-time  
**Work Location(s):** Mountain View, CA

**Redfin**

http://www.redfin.com

**Description of organization:**
Redfin is an online real estate brokerage, half E-Trade, half Century 21. Redfin reached its first profits last year, and is doubling traffic and revenues year over year with no marketing expense; the current revenue run-rate is tens of millions of dollars.

Customers use Redfin’s website as well as its local real estate agents to buy or sell a home. In big cities, the agents are Redfin employees; everywhere else they’re partners.

In each market, Redfin has access to 30% more listings than media sites like Zillow and Trulia, and tech-based economies of scale that franchise brokerages can’t match -- a Redfin agent is ten times more efficient than a traditional agent.

**Job/Internship:**
Redfin Agent Development Program, Marketing Coordinator (Intern and Full Time), UI/UX Designer (Intern and Full Time)

At Redfin, you can help fundamentally change the way people buy and sell homes. We're transforming a $60 billion industry and empowering consumers. From the technology we build to the brokerage services we provide, we make real estate better for everyone. We're customer advocates and transparent truth-tellers. Forget pushy sales. It's not about closing a deal; it's about doing right by our customers.

**Type:** Real Estate  
**Degree(s):** Bachelor  
**Major(s):** All Majors  
**Position(s):** Paid, Full-time, Internship  
**Work Location(s):** San Francisco, CA / Seattle, WA
RiskIQ

Description of organization:
Enterprises are accustomed to being protected within the confines of their firewall. However, in the last decade we've seen a fundamental shift to cloud-based services and an increased reliance on web and mobile applications to conduct day-to-day business. With this shift comes a burdensome responsibility.
Knowing is the best defense.
RiskIQ reveals where your online infrastructure is posing a threat to your customers. With RiskIQ, you'll be able to see how your customer is experiencing your brand on web and mobile platforms in real time and:
> Immediately identify risk to your customers
> Root out malware, fraud and compliance violations
> Ensure safe and productive customer interactions

Job/Internship:

Salesforce.com

http://salesforce.com

Description of organization:
Salesforce.com is the global leader in customer relationship management (CRM) software. We pioneered the shift to cloud computing, and today we’re delivering the next generation of social, mobile and cloud technologies that help companies revolutionize the way they sell, service, market and innovate—and become customer companies. We are the fastest growing of the top 10 enterprise software companies, the World’s Most Innovative Company according to Forbes and one of Fortune’s 100 Best Companies to Work For. Our “more human, less corporate” culture is built around doing work that matters, winning as a team and celebrating success. Join the #FutureForce team as an intern or a new college grad and get on the path to your #dreamjob.

Job/Internship:
Job Summary:
This is your time to shine. Our software development interns are considered full time employees by their peers—in fact, you will be expected to contribute right away as a member of our Scrum teams for future releases. As the world leader in enterprise cloud computing, we release 3 new versions every year with close to 100 new features each release. You will write code that reaches millions of subscribers who use our applications everyday, work on our automated testing infrastructure, and craft the tools that provide real-time monitoring of our service. With such quick turnaround, we don’t want our interns to sit on the sidelines and enjoy the view—we want you to change the way our customers connect their business to the world!

Work Location(s): Cupertino, CA

Smith & Associates

Description of organization:
SMITH & ASSOCIATES - www.smithweb.com
Smith & Associates was founded by two brothers in the 1980’s, at that time, they were in their mid 20’s and had an idea of starting a global company that brokered electronic components and semiconductors. Fast forward 30 years and the company is now the number one independent distributor of electronic components in the world! Smith is has grown to 400 people with 15 offices, domestic and internationally.

Job/Internship:
Smith & Associates has approximately 115 sales people that put up a sales revenue of over A HALF BILLION DOLLARS! Hard work and determination are two key qualities that make our sales people successful; we pay salary plus 10 percent commission OF EVERY PROFIT OF EVERY DEAL.

We hire entrepreneurial types that are confident in their sales abilities by marketing our company worldwide, targeting companies in any country with no defined territories. We depend on our sales people to open up new ways of doing business while thriving in current business practices. If you have what it takes to basically run your own business within ours, work with a team and need not to be micro managed the let’s get started: apply online.

We are hiring for Internships as well as Full Time.

Type: Electronics and Misc. Tech
Degree(s): Bachelor
Major(s): All Majors
Position(s): Full-time, Internship
Work Location(s): Pleasanton, CA / Houston, TX / International
**Southern California Edison**

**Description of organization:**
Southern California Edison (SCE) is one of the nation’s largest investor-owned electric utilities. As a longtime leader in renewable energy and energy efficiency, we are looking for highly motivated individuals who enjoy the challenge of working on designing new and innovative ways to meet our customer’s needs. With headquarters in Rosemead, SCE serves more than 14 million people in a 50,000 square-mile area of central, coastal and Southern California.

**Job/Internship:**
As an energy planning analyst with Resource Planning, candidates will be expected to work individually and on teams to perform quantitative analysis that will help to inform the long term energy resource needs for Southern California Edison (SCE) and California.

**Type:** Energy  
**Degree(s):** Bachelor, Masters  
**Major(s):** Business Administration, Engineering, Natural Resources/Environmental  
**Position(s):** Full-time  
**Work Location(s):** Rosemead, CA

---

**Splunk**

**Description of organization:**
Splunk was founded to pursue a disruptive new vision: make machine data accessible, usable and valuable to everyone. Machine data is a fast growing and a pervasive part of “big data”. Splunk is focused specifically on the challenges and opportunity of effectively managing massive amounts of machine data, and providing a next-generation platform for powerful new applications. Since shipping its software in 2006, Splunk now has customers in 90+ countries around the world. These organizations are using Splunk to harness the power of their machine data for application management, IT operations and infrastructure management, cyber-security, business analytics and more. Innovation is in our DNA – from technology to the way we do business.

**Job/Internship:**
**Responsibilities:**
- Write server-side code for data collection, search and indexing using C/C++.
- Create robust, fault-tolerant distributed systems in a multi-threaded/multi-process environment
- Analyze and improve the scalability of data collection, routing, storage and retrieval.
- Scale data-intense problems horizontally rather than vertically.
- Learn Splunk, both the product and about the company
- Become a part of our Splunk family and participate in our fun team events

**Requirements:**
- Familiarity with Unix/Linux and/or Windows OSs, Linux is preferred
- Knowledge of programming languages (Python, Java, C/C++, Ruby)
- Strong communication skills, verbal and written
- Enthusiasm for solving problems

**Type:** Computer Software  
**Degree(s):** Bachelor, Masters, Doctoral, Postdoc, Professional  
**Major(s):** Computer/Physical Sciences  
**Position(s):** Paid, Full-time, Internship  
**Work Location(s):** United States
St. Vincent's
Programs and Services

Description of organization:
St. Vincent's Programs and Services provides residential treatment and community based services to at risk children and families throughout the Bay Area. St. Vincent's primary residential treatment center is located in San Rafael.

Job/Internship:
Group Counselors provide support to abused, neglected and disturbed children in a residential treatment setting.
In Home Support Counselors provide support to children placed in foster homes.
Family Specialists provide support to children and families throughout the Bay Area who are at risk for having their children placed in out of home care.
Therapeutic Behavioral Specialists develop behavioral treatment plans for children in residential treatment and community based settings.

Type: Non-Profit and Social Services
Degree(s): Bachelor, Masters
Major(s): All Majors, Neuroscience, Social Welfare, Psychology, Sociology
Position(s): Paid, Part-time, Full-time, Internship
Work Location(s): Our primary treatment center is in San Rafael, although we provide community based services throughout the Bay Area.

STAT Revenue Consulting

Description of organization:
Founded in 1998, STAT Revenue is a rapidly growing, Emeryville-based healthcare consulting firm that specializes in revenue recovery for hospitals. Our nationwide expertise adds value to our clients through a proprietary post payment insurance audit of patient accounts to maximize current revenue and protect future cash flow. STAT Revenue's goal is to promote strong communities by helping hospitals improve their financial well-being. Our team of dedicated consultants work hard to achieve this goal and to provide services of exceptional quality. The result has been a high level of client satisfaction and a significant increase in their revenue streams.

Job/Internship:
STAT Revenue's Associate Consultants help increase hospital’s bottom line by analyzing large volumes of data for payment accuracy. Consultants conduct research to identify new revenue opportunities for hospitals. They evaluate hospital’s internal procedures to identify areas of weakness and potential improvement. Furthermore, Associate Consultants help create and implement process improvements and trainings to protect the hospital’s future revenue.

STAT Revenue’s Data Analysts help increase a hospital’s bottom line by analyzing large volumes of data for payment accuracy. Analysts are challenged to constantly improve STAT Revenue’s ability to identify and capture revenue opportunities in a more efficient manner for hospitals.

Type: Financial Services, Hospital/Healthcare
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): All Majors
Position(s): Paid, Full-time, Internship
Work Location(s): Emeryville, CA
STE Consultants

Description of organization:

SunPower Corporation

Description of organization:
Do you want to change the world? We do, too.

The energy market is roughly $4 trillion globally, and solar penetration is less than 1%. But just one hour of sunlight, if harnessed, could power the entire world for a year. We have the opportunity to completely change the way energy is produced, distributed and consumed on a global scale, and we’re looking for talented, committed people to help us drive our growth and achieve our goals.

SunPower is a global solar energy solutions company with a rich heritage of pioneering the best energy technologies in the world. Our solutions are unrivaled in terms of long-term reliability, efficiency and guaranteed performance, and our company is unmatched in terms of global reach and scale. Through design, manufacturing, installation and ongoing

Job/Internship:
SunPower is hiring a Treasury Analyst to provide immediate positive contributions to the corporate finance team. The Analyst will be involved in and responsible for various elements within corporate cash management, capital structure analysis, insurance, and other treasury related matters. The position will be based in San Jose reporting to the Treasury Director and will have daily interactions with all other members of the treasury team. The position is ideal for any individual launching a career in corporate finance and will provide invaluable experience in corporate treasury, finance, and cross functional collaboration.

Degree(s): Bachelor, Masters, Professional
Major(s): Business Administration
Position(s): Full-time, Internship
Work Location(s): San Jose, CA / Richmond, CA / Austin, TX
SurveyMonkey

https://www.surveymonkey.com/mp/jobs/

Description of organization:
SurveyMonkey is the world's leading provider of web-based survey solutions, but there's really much more to us than that. We're a smart, passionate group of people who work hard to deliver the best survey experience on the planet, period. We do this because we believe everyone deserves easy access to the insights and information they need to make better, more informed decisions. We're also proud to admit that despite our incredible growth, we refuse to grow up. We are still small and nimble; everyone plays an impactful role; and when we say good ideas can come from anyone, we mean it.

Job/Internship:
Survey Monkey is looking for Software Engineers who have a passion for solving complex and interesting problems. In addition to scaling our immensely popular website, we are looking for people who can help with advanced analysis and data visualization, natural language processing, and new storage architectures.
Qualifications:
In-depth, hands-on knowledge of Python and experience working with the relevant tools
Experience with Python web frameworks, like Pylons/Pyramid or Django; or for other languages, like Ruby on Rails
Able to write efficient SQL queries and design schemas for relational databases
Culture of code reviews, writing tech specs, and collaborating closely with other people (not a solo hacker)

Type: Other
Degree(s): Bachelor
Major(s): All Majors, Computer Science
Position(s): Full-time, Internship
Work Location(s): Palo Alto, CA

Urban Teacher Center

http://www.urbanteachercenter.org

Description of organization:
Mission
The mission of the Urban Teacher Center is to prepare highly effective teachers who significantly accelerate student achievement in the nations highest-need schools. We will accomplish this by recruiting outstanding candidates, equipping them with state of the art training, and linking their certification to their students performance outcomes. Over time, these teachers will be among the most expert and results-oriented in the nation, assuming leadership roles and making the public case for better teacher preparation and educator accountability.

Job/Internship:
With four years of intensive support, graduates of the Urban Teacher Center (UTC) are well positioned to make an impact in the classroom and to discover rewarding careers in education. Participants leave the program with:
A masters degree with a dual focus from Lesley University in Elementary Education, Secondary Math Education, or Secondary Literacy Education, and Special Education.
Two state teaching licenses in the same two areas.
Four years of data illustrating their effectiveness in improving student performance.
A strong professional community of like-minded, talented teachers.

**VSC Consulting**

Description of organization:
The team at VSC Consulting has the opportunity to work with the most innovative minds and companies around. Over the past decade, the voice of our agency has shaped trends that are reflected in the games you play, the apps and services you access on your smartphone and the marketing campaigns that move you. We're also evolving a new division of the agency called Wareness.io, a marketing studio devoted to launching smart hardware products.
We work with the most influential VCs, entrepreneurs, incubators and angel investors and our clients have exited to the tune of $8.2B to the likes of Google, Twitter and eBay. Culture is everything to us and it goes far beyond our retreats to Hawaii and generous incentives. Your voice will evolve it so that we're ALL living our dream jobs!

Job/Internship:
Are you ready to create and tell the stories that will shape the world?
We're looking for smart professionals with a dedicated interest in or demonstrated aptitude for strategic communications, marketing and/or branding to join our team. Experience with start-ups is a plus, and experience with smart hardware products is a double plus! If you're a strategic thinker with a passion for creatively telling your clients' stories to the media and driving the client experience to help bring their products to market, you're just who we're looking for. After all, why work for one startup, when you can work with them ALL?

Type: Media
Degree(s): Bachelor, Masters, Doctoral, Postdoc, Professional
Major(s): All Majors
Position(s): Paid, Full-time, Internship

**Yelp**

**Description of organization:**
Yelp is an online urban city guide that helps people find cool places to eat, shop, drink, relax and play, based on the informed opinions of a vibrant and active community of locals in the know. Yelp is the fun and easy way to find, review and talk about what's great — and not so great — in your world.

http://www.yelp.com

Yelp was founded in San Francisco in July 2004. Since then, Yelp communities have taken root in major metros across the US, Canada, UK, Ireland, France, Germany, Austria, The Netherlands, Spain, Italy, Switzerland, Belgium, Australia, Sweden, Denmark, Norway, Finland, Singapore, Poland, Turkey, New Zealand, the Czech Republic and Brazil.

**Job/Internship:**
Account Executive
As an Account Executive in our Yelp Sales Development Program (YSDP), you will help local businesses connect with consumers through Yelp Ads. But it doesn’t stop there. YSDP provides a two-year track for your professional growth, which means you’ll always know where you stand. This transparent program outlines what you need to be doing every day, month, and quarter to reach the next level. Increased compensation, title, and responsibilities will keep your career moving in the right direction. If you’re looking for a career (not a job), a company that's invested in your personal development, a solid compensation package, and great training, we know just the place.
